

Independent Review of EvalForward Community of Practice

Annex 6.
Implicit theory
of change

The Review's Theory of Change (TOC) Reveal and Reflect method produced a TOC for EvalForward. This was first co-created with the Steering Committee and Facilitator in a series of interviews to build and validate the TOC that had until then been implicit in the 2018 Strategy for EvalForward. This implicit TOC would subsequently be discussed with partners and collaborators to reflect on its logic and sufficiency. A simplified version of communication that also reflects the impact of recommendations was the final TOC stage (Section 5). The original implicit TOC diagram and key are shown in the pages that follow.

Key to EvalForward Implicit Theory of Change

- 1 Assumption: There are opportunities to use learning in practice
- 2 Assumption: There is funding for evaluation capacities
- A Note: Change in particular for those who have been blog authors
- B Note: Change in particular for those who have been webinar speakers
- C Note: Includes appreciation / role of evaluation at the Research for Development (R4D) Nexus
- D Note: Impact should now also relate to on Monitoring conduct and use
