Note on methodology:

Data on production volumes published in this statistical compendium are compiled from several sources: data retrieved from FAOSTAT of the FAO's Statistics Division; responses to the annual questionnaire of the FAO Intergovernmental Sub-Group on Tropical Fruits; official data from National Statistics Offices; and secondary data from desk research. Due to the informality of tropical fruit production in many major producing areas, which includes unreported foraging and subsistence cultivation, precise figures for total global production are difficult to ascertain. In particular, 2017 production data are preliminary estimates and involve expert judgment on global crop assessments.

Raw data on trade volumes are compiled from: the responses to the annual questionnaire of the FAO Intergovernmental Sub-Group on Tropical Fruits; data from the UN Comtrade database; official data from National Statistics Offices; and secondary data from desk research. All data refer to global trade of fresh or dried major tropical fruits, as covered by HS codes 080430 (pineapple); 080440 (avocado); 080450 (mango, mangosteen and guava); and 080720 (papaya) under the harmonized tariff nomenclature system of the World Customs Organization.

The raw trade data collected are subsequently processed and validated following a rules-based approach designed to exploit all information inherent in the underlying data to produce consistent, plausible and consolidated trade flows at the global level. A variety of imputation rules is applied to eliminate apparent mistakes in reporting and processing of the raw data.

Data on the European Union and the United States of America import volumes by origin are compiled from data provided by the European Commission and the US Department of Agriculture (USDA), respectively. Data are reported as collected and totals may differ from the processed and validated data reported in the 'World import by country' tables.

Price data on the United States of America wholesale prices are calculated from data collected from the USDA Agricultural Marketing Service (AMS) terminal market reports.

For further information, please send your inquiries to: Tropical-Fruits@fao.org.

For further information and previous market reports on global trade in bananas and tropical fruits, please refer to the following pages:

<http://www.fao.org/economic/est/est-commodities/tropical-fruits/>

<http://www.fao.org/economic/est/est-commodities/bananas/>

For information on best practices for sustainable banana production and trade, please consult the website of the World Banana Forum: <http://www.fao.org/wbf>

Foreword

This Statistical Compendium is issued on an annual basis to Members and Observers of the Sub-Group on Tropical Fruits of the Intergovernmental Group on Bananas and Tropical Fruits, which is a subsidiary body of the Committee on Commodity Problems (CCP). It is prepared by the Team on International Investment and Tropical Fruits, Trade and Market Division, FAO, Rome, and the tables contained bring together the information available to FAO, supplemented by data obtained from other sources in particular with regard to preliminary estimates.

The Team on International Investment and Tropical Fruits provides research and analyses on agricultural investments in developing countries, and economic data and analyses on tropical fruits. Regular publications include market reviews, outlook appraisals and projections for bananas and tropical fruits. The team also provides assistance to developing countries in designing and implementing national policies regarding responsible investment in agriculture. The report is available at the following FAO website: <http://www.fao.org/economic/est/est-commodities/tropical-fruits/en/>
