International Day for the Fight against
Illegal, Unreported and Unregulated Fishing

SUSTAINABLE FISHING STARTS WITH US

SAVE THE DATE

CLOSING THE NET ON IUU FISHING

Illegal, Unreported and Unregulated (IUU) fishing impacts the health of our aquatic ecosystems, the livelihoods of fishers and their communities, and the fish we eat. When IUU-caught fish ends up on our plates, we are unwitting accomplices in unsustainable, and often criminal practices, that are damaging for our future well-being and the sustainability of our planet.

As **consumers**, we can contribute to stop IUU fishing with the greatest tool we have, **our personal choice**. Paying attention to the source of the seafood we buy, to its traceability and environmental sustainability is a powerful way to start. We can make a difference.

Join us as we discuss this most interesting topic with an incredible line-up of experts and ocean lovers. You will learn how IUU fishing is impacting our lives and our ocean and how we can contribute to stop it.

“Together we can close the net
on IUU fishing”
