

NGARA - Revival

Strategic elements

2015

Sustainable production and Restoration of resources

- Regular **assessment** and monitoring, mapping, of resources including trends/ dynamics as well as genetic resources
- Sustainable **management** and governance of the resources
- Support **Restoration** programmes as well as plantations
- Support **provision of certified and quality planting materials** (sharing responsibilities –tasks between participants)
- Handling of trans-boundary material and products

Other strategic elements

- **Market & Investment**
- **Enabling policies and legal framework**
- **Capacity development**
- **Research**
- **Strengthening Coordination**
- **Communications, advocacy and visibility**
- **Discussion on focal points
(Gov, Private sector)**

Wrap-up

- NGARA has to move swiftly to be registered so that they communicate with government
- Need also a process of consultation between NGARA and governments for focal points of Government as well as with the business community for focal points
- We should be quick and be careful not loose institutional memory
- A way: when NGARA writes to governments, the exiting representatives should facilitate this consultation and follow-up. The secretariat should writes to the right institutions (within the next month)
- Mandate of the focal points need to be prepared and clear and communicated to governments (Board can draft these).
