

## Climate change and food security

© Biodiversity International

This course provides an overview of the impacts of climate change on food security. It also introduces climate-smart agriculture and practices that contribute to climate change adaptation, mitigation, food security and development.

Up to 3.5 hours of learning, depending on learning needs

Available in English, French and Spanish

### You will learn about

- Main effects of climate change on environment
- Climate variability and global warming
- Extreme weather events
- Impacts of climate change on food security
- Climate change adaptation and mitigation in agriculture
- Climate-smart agriculture

## Who is the course for?

The target audience of this course includes: mid-level managers, technical staff, field personnel who are involved in the collection, management, analysis, and reporting of food security information, as well as, planners, policy formulators and programme managers who are involved in monitoring progress in poverty reduction, and meeting food security goals and targets.

## Key partners

The course was developed in the context of the "EC/FAO Programme on Linking Information and Decision Making to Improve Food Security, funded by the European Union (EU) and implemented by the Food and Agriculture Organization of the United Nations (FAO).
