

Integrated Food Security Phase Classification protocols for acute food insecurity

©FAO/IPC

This course provides guidance to complete the Protocols for the Integrated Phase Classification of acute food insecurity. It provides step-by-step guidance to complete the Protocols for each of the four functions of the IPC, and the special protocols for areas with limited or no humanitarian access.

6 hours

Available in English

You will learn about

- Purpose of the four IPC functions for acute food insecurity: building technical consensus, classifying severity and identifying key drivers, communicating for action, and quality assurance.
- How to complete all the protocols of each of the four functions.
- How to complete special protocols for areas with limited or no humanitarian access.

Who is the course for?

The course is aimed at professionals who are or want to be involved in IPC activities at global, regional or country levels, including:

- food security and nutrition analysts
- local officers
- sectoral experts
- communication officers.

Key partners

This e-learning course has been developed by the Food and Agriculture Organization of the United Nations (FAO) for the IPC Global Strategic Programme and funded by the European Union (EU), UK Aid and US Aid. The content of this course is based on the Integrated Food Security Phase Classification (IPC) Technical manual Version 3.0 “Evidence and standards for better food security and nutrition decisions”, which results from the joint efforts of the IPC Global Partners.
