

The 68th UN General Assembly declared 2015 the International Year of Soils (IYS).

The Food and Agriculture Organization of the United Nations has been nominated to implement the IYS 2015, within the framework of the Global Soil Partnership and in collaboration with Governments and the secretariat of the United Nations Convention to Combat Desertification.

2015

International Year of Soils

healthy soils for a healthy life

“ *The International Year of Soils will help us pave the road towards sustainable development for all and by all.* ”

José Graziano da Silva, FAO Director-General

PROTECT OUR SOILS

Our soils are in danger because of expanding cities, deforestation, unsustainable land use and management practices, pollution, overgrazing and climate change.

The current rate of soil degradation threatens the capacity to meet the needs of future generations.

WE DEPEND ON SOILS

Healthy soils are the basis for healthy food production

Soils are the foundation for vegetation which is cultivated or managed for feed, fibre, fuel and medicinal products

Soils support our planet's biodiversity and they host a quarter of the total

Soils help to combat and adapt to climate change by playing a key role in the carbon cycle

Soils store and filter water, improving our resilience to floods and droughts

Soil is a non-renewable resource; its preservation is essential for food security and our sustainable future

SPECIFIC OBJECTIVES

Raise awareness among civil society and decision makers

Educate the public

Support effective policies and actions for the sustainable management and protection of soil resources

Promote investment in sustainable soil management activities

Strengthen initiatives in connection with the Sustainable Development Goals (SDG) process and Post-2015 agenda

Advocate for rapid capacity enhancement for soil information collection and monitoring at all levels
