

Gender in food and nutrition security

© FAO/Roberto Falducci

The course helps raise awareness about the importance of addressing gender equality in food and nutrition security and agricultural policy and programming. It also provides concrete skills and tools that can be used in real-life policy and programming situations.

Up to 14 hours of learning, depending on learning needs

Available in English, French and Spanish

You will learn about

- Gender equality concepts and principles
- Gender dimensions of food and nutrition security
- Producing gender statistics to inform policy and legislation
- Formulating and implementing gender-responsive food and nutrition security policies
- Conducting a gender analysis
- Designing, implementing, monitoring and evaluating gender-responsive programmes

Who is the course for?

All those who wish to improve their knowledge and skills to conduct gender analysis, and collect relevant data to design, implement, monitor and evaluate agriculture and food and nutrition security policies and programmes that are gender-responsive. This may include policy and decision-makers, programme and project managers, statisticians, programming and monitoring staff.

Key partners

This course was produced under the umbrella of the EU-FAO Programme on “Improved Global Governance for Hunger Reduction”, funded by the European Union (EU) and implemented by the Food and Agriculture Organization of the United Nations (FAO).
Contributing organization: Gender and Water Alliance (GWA).
