The boundaries and names shown and the designations used on the maps featured in this information product do not imply the expression of any opinion whatsoever on the part of the Food and Agriculture Organization of the United Nations (FAO) concerning the legal or development status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries. Dashed lines on maps represent approximate border lines for which there may not yet be full agreement. The mention of specific companies or products of manufacturers, whether or not these have been patented, does not imply that these have been endorsed or recommended by FAO in preference to others of a similar nature that are not mentioned.

The views expressed in this information product are those of the author(s) and do not necessarily reflect the views or policies of FAO.

Terminology

- All supply and demand figures are FAO forecasts and estimates based on official and unofficial sources.
- Cereals include: wheat, rice and coarse grains. Coarse grains include: maize, barley, sorghum, millet, rye, oats and NES (Not Elsewhere Specified).
- All elements of utilization for wheat and coarse grains are expressed in grain equivalent.
- For rice, all elements are expressed in milled terms.
- Non-food use includes post-harvest losses, seed use, feed use and industrial use for all cereals.
- '-' means nil or negligible.
- The source of the population figures is the "[2019 Revision of World Population Prospects](#)" prepared by the Population Division of the Department of Economic and Social Affairs of the United Nations Secretariat.

The Global Information and Early Warning System on Food and Agriculture (GIEWS) continuously monitors crop prospects and food security situation at global, regional, national and sub-national levels and warns of impending food difficulties and emergencies. Established in the wake of the world food crisis of the early 1970's, GIEWS maintains a unique database on all aspects of food supply and demand for every country of the world. The System regularly provides policy makers and the international community with up-to-date information so that timely interventions can be planned and suffering avoided.

The FAO/GIEWS Country Cereal Balance System (CCBS) is a database of annual supply and utilization balances for main cereals, covering all countries of the world. Since 1980, the FAO/GIEWS Team maintains and updates it continually.

This statistical report contains a subset of CCBS data and presents updated cereal supply and demand balances for all sub-Saharan African countries. It complements the information of the FAO/GIEWS Crop Prospects and Food Situation report and is published four times a year with the same schedule.

This report is based on information available as of November 2020.

The Global Information and Early Warning System on Food and Agriculture (GIEWS) has set up a mailing list to disseminate its reports. To subscribe, submit the Registration Form on the following link:
