Salmon

COMMODITY update

The COMMODITY UPDATE reports, issued for each commodity once a year, contain information on prices, imports, exports and production by commodity. The information is taken from the network of GLOBEFISH correspondents and the GLOBEFISH European Price Report, INFOFISH Trade News, FAO FISHDAB, EUROSTAT and others.

The issues are scheduled approximately as follows:

FISHMEAL - FISH OIL - *Spring*
BIVALVES - *Spring*
SALMON - *Spring*
FRESHWATER FISH - *Spring*
SHRIMP - *Summer*
TUNA - *Summer*

CRAB - *Autumn*
LOBSTER - *Autumn*
CEPHALOPODS - *Winter*
GROUND FISH - *Winter*
SMALL PELAGICS - *Winter*

<p>For single issues please contact GLOBEFISH Viale delle Terme di Caracalla 00153 Rome ITALY Tel: ++39 0657052692 Fax: ++39 0657053020 E - mail: globefish-pub@fao.org Web site: www.globefish.org</p>	<p>For an annual subscription to the complete set please contact EUROFISH H.C. Andersens Blvd. 44-46 1553 Copenhagen V Denmark Tel: ++45 33377755 Fax: ++45 33377756 E - mail: info@eurofish.dk Web site: www.eurofish.dk</p>

TABLE OF CONTENTS

MARKET REPORTS

Salmon Report - April 2011	1
----------------------------	---

PRICES

Fresh salmon prices, origin Norway, Scotland, 2-3 wholesale Rungis, France, (in €/kg)	7
Monthly Atlantic salmon prices, in Europe, origin Norway, in Euro/kg Fresh, gutted, head-on, 3-5 kg/pc	9
Monthly Atlantic salmon prices, FOB Miami, origin Chile, in USD/lb, fresh fillets, C-trim, 3-4 lb	9

IMPORTS

Total imports of fresh, chilled, frozen salmon, into EU member countries, in 1000 tonnes	10
Total imports of fresh, chilled, frozen salmon, into EU member countries, in million €	11
Total imports of canned salmon, into EU member countries, in million €	12
Total imports of canned salmon, into EU member countries, in 1 000 tonnes	13
Imports of salmon into Germany by product form and country of origin, in tonnes	14
Imports of salmon into Spain by product form and country of origin, in tonnes	16
Imports of fresh and frozen salmon in the UK, by product form and country, in tonnes	18
World imports of fresh and chilled salmon, by major importing countries, in 1000 tonnes	19
World imports of fresh and chilled salmon, by major importing countries, in USD million	20
World imports of frozen salmon, by major importing countries, in 1000 tonnes	21
World imports of frozen salmon by major importing countries in USD million	23
World imports of smoked salmon, by major importing countries, in tonnes	25
World imports of smoked salmon, by major importing countries, in million USD	26
World imports of prepared and preserved salmon, by major importing countries, in 1000 tonnes	27
World imports of prepared and preserved salmon, by major importing countries, in USD million	28

Imports of salmon into France, by product form and country of origin, in 1 000 tonnes	29
Imports of fresh and chilled salmon into Japan, by country of origin, in tonnes	31
Imports of fresh and frozen salmon into Japan, by country of origin, in 1 000 tonnes	31
Imports of canned salmon into the UK, by country of origin, in 1 000 tonnes	32
Imports of canned salmon into the Netherlands, by country of origin, in tonnes	33
Imports of canned salmon in European countries, in 1000 tonnes	34
Italian imports of prepared and preserved salmon, by country of origin, in tonnes	35

SALMON EXPORTS

Yearly production and exports by destination countries of farmed salmon from Norway, in 1000 tonnes	36
Total exports by EU** member countries of fresh, chilled, frozen salmon, by country of destination, in million €	38
Total exports by EU** member countries of prepared and preserved salmon by country of destination, in 1 000 €	39
Total exports by EU member countries of fresh, chilled, frozen salmon by country of destination, in 1 000 tonnes	40
Total exports by EU member countries of prepared and preserved salmon by country of destination, in tonnes	41
Yearly salmon exports from the UK by product and countries, in tonnes	42
World exports of fresh and chilled salmon, by major exporting countries, in 1 000 tonnes	44
World exports of fresh and chilled salmon, by major exporting countries, in USD million	45
World exports of frozen salmon, by major exporting countries, in 1 000 tonnes	46
World exports of frozen salmon, by major exporting countries, in USD million	47
World exports of smoked salmon, by major exporting countries, in tonnes	48
World exports of smoked salmon, by major exporting countries, in USD 1 000	49
World exports of prepared and preserved salmon, by major exporting countries in 1 000 tonnes	50
World exports of prepared and preserved salmon, by major exporting countries in USD million	51
Yearly exports of fresh and frozen salmon from the USA, by countries of destination, in 1000 tonnes	52
Yearly exports of salmon from the USA, by major species and product forms, in 1000 tonnes	53

SALMON PRODUCTION

World captures of wild salmon by country, in 1 000 tonnes	55
World production (captures + aquaculture) of salmon, by major producing countries, in 1 000 tonnes	56
World farmed trout production, by major producing countries, in 1 000 tonnes	57
World farmed salmon production, by species and major producing countries, in 1 000 tonnes	59
Yearly production (aquaculture + captures) of salmon, by species, in 1 000 tonnes	60

SALMON PROCESSING

Yearly production of frozen salmon by major producing countries, in 1 000 tonnes	63
Yearly production of fresh, chilled and frozen salmon fillets by major producing countries, in tonnes	64
Yearly production of smoked salmon by major producing countries, in 1 000 tonnes	65
Yearly production of salmon salted or in brine by major producing countries, in 1 000 tonnes	66
Yearly production of prepared and preserved salmon by major producing countries, in 1 000 tonnes	67

SALMON REPORT

Salmon production in 2010 less than half in Chile

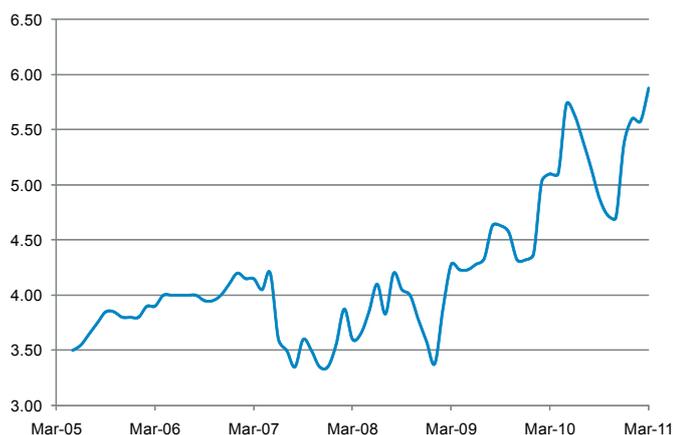

Chilean production of Atlantic salmon in 2010 will probably be less than half of the levels registered in previous years. The available figures for harvests show that up to November 2010 there was a 54% reduction in aquaculture output. A similar trend is observed in coho salmon (-51% up to November), and to a lesser extent, in trout (-21% in the same period). Trout is consolidating its leading position after the ISA virus spread among Atlantic salmon, and currently accounts for nearly 40% of all salmonid production. According to preliminary figures, total production of salmon and trout in 2010 totaled 287 500 tonnes, 22% below total production in 2009.

As already mentioned in previous issues, the industry has gone through stringent transformations, which are expected to place it on the road to a sound recovery. However, the new structure has been criticized already by the coho salmon and trout producers as having higher production costs. Nevertheless, some companies are aiming to double production in 2011, while others consider the Chilean salmon sector as set for a longer term recovery, with higher production, and a recovery of profitability. Some forecasts, such as the one stated by representatives of the industry at the North Atlantic Seafood Forum, expect that the 2007 level of output will be reached by 2013.

Lower supply reflected in lower exports, while trade directions shift

The lower availability of raw material was reflected in a 20% drop in exported volumes, totaling 297 200 tonnes of salmon and trout sold to foreign markets. It is important to note that trout has surpassed Atlantic salmon as the main exported species, accounting for 42% of total volumes traded, and an even higher share in total exported value (44%). Overall exports of salmon and

* estimate

trout fell 2% in terms of value, totaling USD 2 061 million, following increases in average unit prices (of +21.5% for Atlantic and Coho salmon, and of +19% for trout).

Perhaps more noteworthy is the shift in the direction of trade. Japan is still the main destination both in volume and value, with 144 000 tonnes worth USD 909 million. However, Latin America is now placed second, above the US, in terms of quantity, with 50 640 tonnes against 45 200 tonnes. However, the situation is the opposite in terms of value, while US purchases fell 20%

to USD 448 million, 20% growth in purchases from Latin America to USD 347 million was not enough to surpass the US market. Interestingly, Latin American demand is driven by Brazil, which represents 76% of total trade in quantity. The region has become an important market for Chilean salmon, helped by strong economic performance, which is translated in a higher purchasing power. After Japan, Latin American markets showed a lower reduction in traded volume (-11%). Another difference is that, while Japan is focused on trout and coho salmon, Brazil demands

mainly Atlantic salmon. Some recent developments, such as the Free Trade Agreement signed with Nicaragua, indicate that the region is acquiring a position that it is likely to retain. In the meantime, import by the EU has fallen to 8 700 tonnes worth USD 72 million, which represents a marginal position in overall trade of salmon and trout during 2010, displaced by the consolidation of Latin America and the other main markets.

Demand seems not to be a problem for Chilean salmonids

Despite higher prices, demand for Chilean products does not seem to decrease. At the beginning of the year Japanese consumption of fishery products was showing signs of recovery. However, the impact that the earthquake and following tsunami will have on demand in the Japanese market is still to be seen. In contrast, the Latin American region and other emerging economies are taking a leading role. This could imply that in the mid-term, as long as production recovers, pressure on prices could be higher, as the Chilean industry would have to supply the markets that it has managed to keep, as well as those that it has gained in the recent years.

Lower salmon imports in the US

Overall imports of salmon in the US in 2010 fell 3% in volume totaling 234 000 tonnes, but given a 12% increase in unit value, the value of imports totaled USD 1 822 million (+8%). Imports of Atlantic salmon accounted for 75% of total imported volumes and 78% of total value, with 176 400 tonnes worth USD 1 439 million. The average unit value of Atlantic salmon imports grew 14% in a year-on-year comparison.

The US Atlantic salmon market was dominated by three main players, Canada, Norway and Chile; however, each country focuses on different market niches. Canada accounted for 44% of total Atlantic salmon imports, and supplied mainly fresh whole salmon (91% of total sales to the US). Norway was placed second, with a 20% share in terms of volume, focusing on the fillet market, with 66% of exports to the US being frozen fillets, while 33% were fresh fillets. As for Chile, the market trend is similar to that of Norway, although the focus on fresh fillets is more pronounced; 78% of Chilean exports to the US were fresh fillets, while 16% were frozen fillets. Recently, the Norwegian salmon industry announced its intention of resuming actions against the imposition of anti-dumping duties on whole salmon exports to the US, effective since 1991. This could help Norwegian producers regain market share in this segment.

In 2010, Norway was the top supplier in both the fresh and frozen Atlantic salmon fillets segments, with 41% and 44% shares respectively. Chile, once the main player in both segments, is now the second supplier of

Source: GLOBEFISH AN 11630

fresh fillets with a 39% share, and the third supplier of frozen fillets with a 17% share, after China (25%).

Prices of fresh fillets showed significant increases from mid November 2010, and have remained stable from the beginning of 2011 until mid February, when they began to increase again. By mid-March quotations for Norwegian salmon were 20% higher both for Norwegian and Chilean fresh fillets. Frozen fillets, on the contrary, have remained stable since prices showed a minor reduction at the beginning of the third quarter 2010.

Good outlook for domestic production

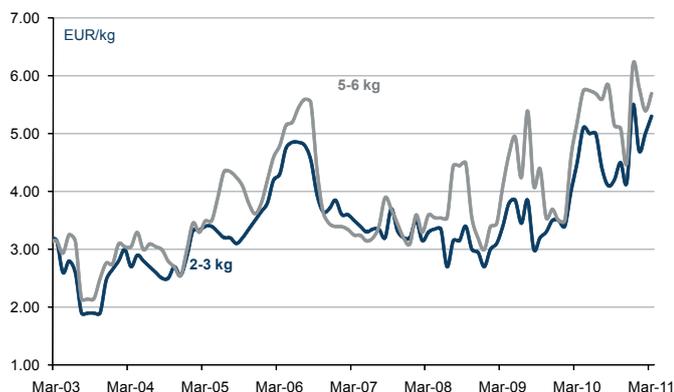

Recently, a fishermen's cooperative from Alaska obtained Friend of the Sea certification for its king and coho salmon fisheries. The cooperative uses the trolling method, enabling each fish to be captured individually. According to Alaskan authorities, the outlook for the 2011 season is very good, as a result of a combination of favourable environmental conditions and the management measures adopted. It is forecast that 203 million fish will be caught this season. Captures of pink salmon are expected to grow 25% to 133.7 million fish, while sockeye salmon captures are forecast to be 45 million fish (+11%). Californian authorities also expect good salmon runs this year, and preliminary projections indicate that captures could grow as much as 200%, from the 245 000 fish projected in 2010 to 729 000 fish.

Higher supply seems likely in the US market

The recovery of the Chilean industry, as well as the positive outlook for domestic salmon fisheries, indicates that supply of salmon to the US market could be higher in 2011. This, despite targeting different market segments, could ease the pressure on prices, which have shown an upward trend in the fresh fillets segment, while the whole fish markets have remained stable with a slight upward trend in some products. Currently, supplies are adequate

for slow demand. This could drive prices down, which, in the mid-term, could see demand pick up.

EU

Reduced production levels in 2010 caused a tight salmon market with high prices. Demand was good throughout the year in spite of some resistance from processors and consumers to the more expensive value-added products.

In 2011, despite the usual weekly fluctuations, Atlantic salmon prices have been remarkably stable during the first quarter, oscillating around NOK 40 CFA Oslo. The forward market expects Atlantic salmon prices to soften somewhat over the next quarter and then drop during the autumn and winter. Similarly, 2012 and 2013 forward prices (in NOK) are expected to be 23% and 33% lower than present levels.

The trout market remains undersupplied as Norwegian farmers give priority to salmon production and Chile's producers are still much below historic production levels.

Norway

The leading producer and exporter of Atlantic salmon saw export volumes grow close to 10% in 2010. Higher prices during the year led to a significant increase in values, up 33% to NOK 30.5 Billion. Trout exports dropped 35% in volume as producers switched to salmon because of the high prices. As a result, trout prices also strengthened during the year.

Norway's exports of Atlantic salmon in January-March 2011 were 207 000 tonnes (round weight equivalents), slightly down (-3.1%) from the same period in 2010.

However, values were up 17.1% to NOK 7.5 billion (EUR 1.0 billion) as a result of the higher prices.

Export volumes to the EU, Norway's largest market with 65% of sales, declined slightly (-3.6%) during the quarter but volumes shipped to the US fell dramatically, from 13 700 in 2010 to 7 900 this year (-43%). The reason for the latter is improved conditions in Chile with Chilean salmon exports to traditional markets increasing again, including to the USA.

The comeback of Chile in the US market is seen particularly in the fresh fillet market where Norway's shipments dropped 58% during the quarter. Norway's fresh fillet exports to the Japanese market, however, showed a dramatic increase of 73%.

Norway's first quarter trout exports in 2011 were down in both value and volume. Average export prices rose 27%. The main markets for Norway's trout, Russia and Japan, were both weaker during the quarter, whereas trout shipments to the EU grew by a surprising 27%.

UK

Salmon export volumes from the UK rose a healthy 14% in 2010. France, traditionally its main market for fresh exports, grew by 21% but since 2009 has been overtaken by the US, which has seen imports from the UK and Norway bounce upwards as a result of the cut-back in Chile's production.

Markets

EU

The EU is still growing in terms of salmon consumption although the high price for Atlantic salmon is forcing processors in particular to look for alternatives. This explains in part the strong growth in imports of frozen salmon products from China. Cost is also driving the outsourcing of the smoking industry to Poland and the Baltics. During the first quarter of 2011, Norway's salmon exports to EU-27, although up in value by 17%, fell back almost 4% in volume.

France

France, the largest market for salmon in the EU, grew by 4% in volume in 2010. The fresh categories are showing the strongest growth, partly because of the decline in Chilean frozen salmon exports. Norway remains the principal supplier dominating the fresh whole (71%) and fresh fillet (91%) categories.

The rapid growth of China's frozen fillets exports, which has now reached 40% of imports, is significant. A large share of this is Pacific species

rather than Atlantics.

In the smoked category, Poland dominates with 73% of French imports. All other foreign suppliers, including Scotland, have seen their share diminish as a result. This is all the more remarkable as the share of Poland only a few years back was less than 5% of the import market. French domestic smokers continue to target the top segments but are more affected by higher costs than foreign suppliers.

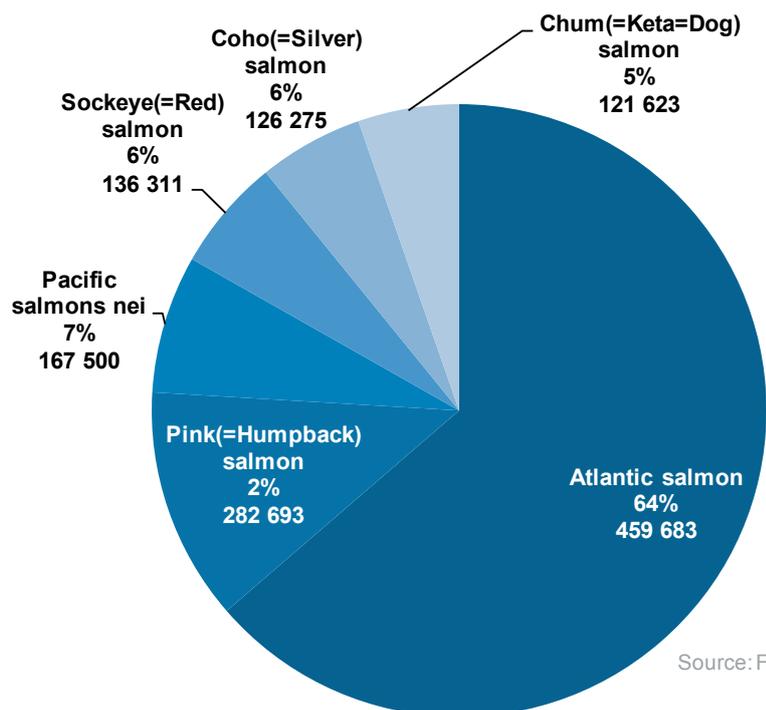

During the first quarter of 2011, Norway's exports to the French market dropped.

Germany

German import volumes were flat in 2010 (+0.6%) after a large increase in 2009 (+19%). The German market is price sensitive and demand was held back by high prices throughout the year. Norway dominates overall followed by Poland, which has captured the smoked segment. China is also showing strong growth in the frozen category, reaching almost 18 000 tonnes last year.

During the first quarter of 2011, Germany's imports from Norway fell back 4% in volume.

Salmon (farmed and wild) production by species (2008)

Source: FAO

Japan

Imports were flat in 2010 in both the fresh and frozen categories. Norway dominates the fresh Atlantic segment and Chile the frozen Pacific category. Imports from Chile were only slightly down from 2009 (-8.3%), as Chilean producers continue to give priority to the Japanese market for its coho exports in particular.

Outlook

Chile's salmon production is increasing but it is unclear how much will come to market this year. The production goals for 2012 and 2013 set by Chile's salmon

Imports

Salmon: France
