

Business strategies and public-private partnerships to end child labour in agriculture

Child labour can be found at all stages of agricultural supply chains, affecting children, enterprise reputation, as well as rural and agricultural development. This course presents a number of business-oriented strategies to reduce child labour in agricultural supply chains, including in crops, livestock, forestry, fisheries and aquaculture. It aims to build specific skills, depending on work-related responsibilities and tasks, by providing concrete ideas and guidance that can be applied in real life situations.

1.5 hours

Available in English, French and Spanish

You will learn about

- The importance of child labour elimination from a business point of view
- How appropriate approaches can reduce child labour in both small and large scale agriculture
- What may contribute to an enabling environment for agricultural investment to reduce child labour
- Characteristics of existing voluntary standards and private sector codes
- Opportunities for, and challenges faced by public-private partnerships for the elimination of child labour in agriculture
