

Food and nutrition security analysis

Course: Markets assessment and analysis

©FAO/Sebastian Liste

The course illustrates how markets operate, how they relate to, and affect, food security and vulnerable households. It describes market components and introduces some of the methods and indicators used to assess markets for improving food security analysis.

2 hours

Available in English, French and Spanish

You will learn about

- Definition of markets and how they relate to food security
- Methods to assess markets for improving food security analysis
- Indicators for creating market profiles or baselines
- Price analysis

Who is the course for?

The target audience of this course includes: mid-level managers, technical staff, field personnel who are involved in the collection, management, analysis, and reporting of food security information, as well as, planners, policy formulators and programme managers who are involved in monitoring progress in poverty reduction, and meeting food security goals and targets

Key partners

The course was developed in the context of the EC/FAO "Food Security Information for Action" Programme, funded by the European Union (EU), implemented by the Food and Agriculture Organization of the United Nations (FAO).

Contributing organizations:

- The United States Agency for International Development
- Famine Early Warning Systems Network (FEWS NET)
