

Food and Agriculture Organization of the United Nations

Pre-COP 26: Climate change, biodiversity and nutrition – Promoting healthy diets from efficient, inclusive, resilient and sustainable food systems

Climate Change, Biodiversity and Nutrition:

Promoting Healthy Diets from Efficient, Inclusive, Resilient and Sustainable Food Systems

**1 October
14:00 CEST**

The online side event ‘Climate Change, biodiversity and nutrition: promoting healthy diets from efficient, inclusive, resilient and sustainable food systems’ will take place at the pre-COP26 hosted by the Italian government. The event will highlight the importance and the need for solutions that concurrently address concerns related to climate change, biodiversity and nutrition.

The virtual dialogue will bring together food systems experts and leaders—from government representatives to civil society, youth, academia and business—to discuss and explore opportunities for collaborative partnerships that simultaneously address climate change, biodiversity and nutrition. The event will focus on the most salient points of food systems required transformations to set a path for the upcoming food summits such as UN Food Systems Summit, CBD COP, COP26 and the Nutrition for Growth Summit in Japan.

Objectives of the event:

- Raise awareness of the importance of the linkages between climate change, biodiversity, and nutrition.
- Provide first-hand accounts of innovations or innovative approaches that can simultaneously address the challenges of climate change, biodiversity and nutrition.
- Foster cross-sectoral dialogue and collaboration to promote the development of synergistic solutions and transformative innovations.

Co-organizers:

FAO, Scaling Up Nutrition Movement and Global Alliance for Climate-Smart Agriculture
