New subscription: *OECD iLibrary*

The Organization for Economic Cooperation and Development (OECD) is a forum where the governments of thirty-seven countries with market-based economies collaborate to develop policy standards to promote sustainable economic growth.

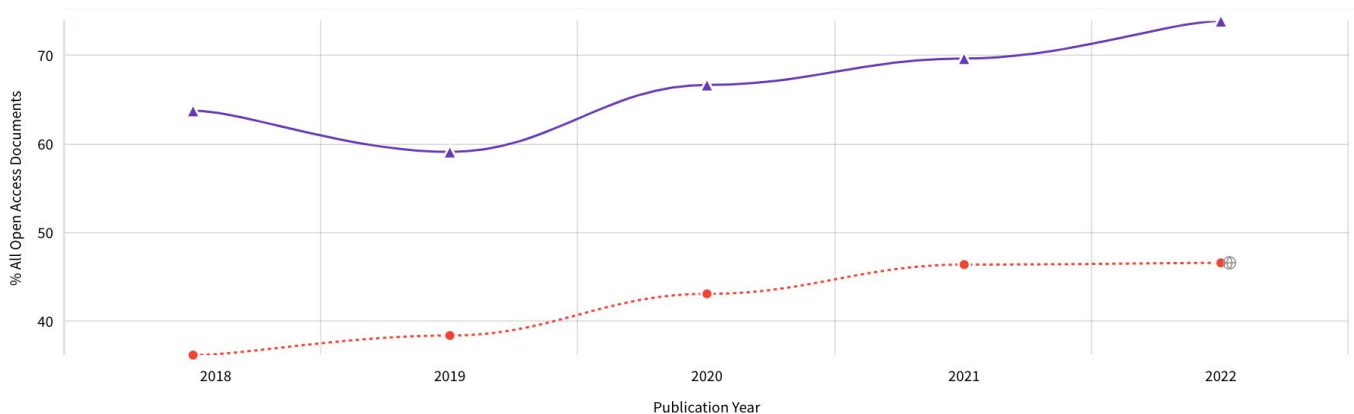

OECD iLibrary features books, papers and statistics and is the gateway to OECD's analysis and data. OECD iLibrary also contains content from the International Energy Agency (IEA), the Nuclear Energy Agency (NEA), the OECD Development Centre, PISA (Programme for International Student Assessment), and the International Transport Forum (ITF). Access **OECD iLibrary** [here](#).

DATA CORNER

Are FAO authors publishing Open Access?

Data from the **Web of Science** indicates that FAO staff are publishing in an increasing number of Open Access journals every year. 74% of the peer-reviewed journal articles published by FAO staff (and indexed in the Web of Science) were Open Access in 2022. This is an impressive number considering the global average was 47%. It appears that FAO staff are doing very well at making their work openly accessible for researchers worldwide.

Purple line = % FAO (co)authored articles published Open Access

Dotted red line = % total articles published Open Access

FAO Library provides access to [InCites Analytics](#), a bibliometric analysis tool based on data from the [Web of Science](#). Every month, we will provide an example of the type of analysis available using this tool. Access the **InCites** platform [here](#). If you already have an account for **Web of Science** or **Endnote Online**, use those same credentials to access the InCites tool. Further information is available in the [Help file](#). Training material (videos, guides, manuals) is available via the [Training portal](#).

JOURNAL ARTICLES BY FAO AUTHORS

The following list provides an overview of the latest **journal articles** and some other document types (editorial material, letters, book chapters and conference proceedings) **(co)written by authors affiliated with FAO**. The main source of information is the **Web of Science (WoS)**, the world's largest publisher-neutral abstract and citation platform of leading peer-reviewed international and regional scientific literature. [FAO Style \(2022\)](#) is used as the citation style.

Are you planning to publish an article?

Please ensure that you are familiar with [FAO's Open Access policy](#), as well as OCC policies and procedures for publishing FAO content in external publications. Please contact Copyright@fao.org before publishing articles externally. Copyright will negotiate a license agreement on your behalf, to ensure FAO retains the right to disseminate the content.

Did you recently publish an article?

Please send the file to document-repository@fao.org and the citation to fao-library-reference@fao.org and we will add the article to the Library's newsletter.
