

Home-grown school feeding

© WFP/Ratanak Leng

Governments and development actors are increasingly recognizing the importance and value that school meals constitute globally. The benefits of Home-grown School Feeding Programme (HGSFP) go beyond education and nutrition to tackle livelihoods of smallholder farmers and local communities. They also strengthen the nexus between nutrition, agriculture and social protection. Based on the HGSFP Resource Framework, this course can help governments achieve their goals and foster a community of practice in home-grown school feeding.

 1.5 hours

 Available in English

You will learn about

- Conceptualizing home-grown school feeding programmes.
- Planning of home-grown school feeding programmes that are well integrated into the national context.
- The different design and implementation options, including models for linking home-grown school feeding to local agriculture.
- Monitoring, evaluating, and reporting on an HGSFP.
