

Enhancing nutrition in emergency and resilience
agriculture responses to prevent child wasting.
FAO's child wasting prevention action plan (2023–2024).

Corrigendum

12/01/2023

The following corrections were made to the PDF of the report after it went to print.

Page	Location	Text in printed PDF	Text in corrected PDF/ Notes
8	Highlight text (right column under Strategic approach)	Wasting persists at alarming rates. Before the COVID-19 pandemic, 47 million children were already wasted in 2019. An additional 6.7 million children under 5 years of age have become wasted since. ²	
22	Notes		New reference added at number 5, shifting the subsequent reference numbers. New reference is: Heady, D., Heidkamp, R., Osendarp, S., Ruel, M., Scott, N., Black, R., Shekar, M. et al. 2020. Impacts of COVID-19 on childhood malnutrition and nutrition-related mortality. In: <i>The Lancet</i> . 2020. <i>Comment</i> .
