

42nd FAO Conference

Introduction to Item 23 - Scale of Contributions 2022-23

The paper before you sets out the proposed FAO Scale of Contributions for the years 2022-2023. This has been derived from the United Nations Scale of Assessments in force during 2021, which was also the one in force during 2019. The 2020-21 Scale is also shown for comparison purposes.

The proposed 2022-23 Scale of Contributions was reviewed by the Finance Committee at its 185th Session in March 2021 and by the Council at its 166th Session in April 2021.

The Conference is invited to approve the draft resolution submitted by the Council on the Scale of Contributions for 2022-23 as presented in document C 2021/LIM/6.

Mr Laurent Thomas, Deputy Director-General
