

## Using data and knowledge to end child labour in agriculture

© UNICEF/Shehzad Noorani

This course explains how to utilize, gather and analyse existing data on child labour in agriculture and identify information gaps. It also provides guidance on generating knowledge, providing an overview of data collection techniques, data processing instruments, and how data can be used more effectively to inform policies and programmes.

 1.5 hours

 Available in English

### You will learn about

- How to gather data on child labour in agriculture and identify the main sources of statistics
- How to list the criteria to evaluate studies providing information on child labour in agriculture and the most common techniques, tools and methods
- Clarify how hazardous work can be measured
- The importance of a well thought communication and dissemination strategy

Digital badge

## Who is the course for?

The course will contribute to the capacity development of policy makers and advisors of agricultural related policy; agricultural programme designers and implementers; agricultural producer organizations; agricultural researchers; and agricultural statisticians who wish and need to know more about tackling child labour in agriculture.

## Key partners

This course was developed by the Food and Agriculture Organization (FAO) in collaboration with the International Labour Organization (ILO). It was co-funded by the Kingdom of the Netherlands.

Goal of the programme is to:

- raise awareness about the importance of addressing child labour in the agricultural sector
- to provide concrete suggestions to be applied in real life agricultural policy and programming situations
