

4 Digital Platforms on protecting Rosewood forest

Pitak Prai : An application that sends notification on suspected illegal encroachment area and update on the forest fire

e-TREE : A digital platform to enhance traceability solutions and forest management system for traders and plantation owners in generating a self-declaration form to verify origin and inventory of the timber during transportation in the supply chain
[e-TREE : testsd.forest.go.th](https://testsd.forest.go.th)

SEPAL : A system for earth observation, data access, processing & analysis for land and near-real time monitoring of forest
[SEPAL : sepal.io](https://sepal.io)

NCAPS : A remote sensing tool using mobile network to assist forest rangers on patrolling activities to detect movement of illegal logging in the forest

You can be part of the solution. Reporting forest crimes is a few clicks away at Pitak Prai. <https://change.forest.go.th/>
