

Food and nutrition security analysis

Course: Baseline food security assessments

©FAO/Ch. Errath

This course describes the purpose and features of baseline assessments and how they differ from action-oriented assessments. It also provides guidance on selecting a baseline assessment method depending on the context, and on how to incorporate historical trends when conducting food security assessments

2 hours of learning, depending on learning needs

Available in English, French and Spanish

You will learn about

- Overview of baseline and action-oriented assessments
- Understand the criteria for defining an appropriate method, building on the options available.
- Selecting a baseline assessment method
- Monitoring changes in food security: early warning and monitoring food security trends

Who is the course for?

The target audience of this course includes: mid-level managers, technical staff, field personnel who are involved in the collection, management, analysis, and reporting of food security information, as well as, planners, policy formulators and programme managers who are involved in monitoring progress in poverty reduction, and meeting food security goals and targets

Key partners

The course was developed in the context of the EC/FAO "Food Security Information for Action" Programme, funded by the European Union (EU) and implemented by the Food and Agriculture Organization of the United Nations (FAO).
