

Using EX-ACT to estimate the mitigation potential of agricultural interventions

This e-learning course guides learners on how to use the Ex-Ante Carbon-balance Tool (EX-ACT) to quantify the climate change mitigation potential of your agricultural interventions (projects, programmes or policies).

The course is based on EX-ACT version 9.

8 hours 30 minutes

Available in English

You will learn about

- Understand the key concepts used in EX-ACT.
- Describe the intended use of each of the EX-ACT modules.
- Understand the structure, function and mandatory data requirements of the EX-ACT modules.
- Populate the data cells in each module.
- Read and interpret the results of the greenhouse gas (GHG) analysis generated by the tool.
