

Design and monitor nutrition-sensitive agriculture and food systems programmes

This is the fourth of a series of e-learning courses on Nutrition and Food Systems, which will guide you through the steps required to design of a nutrition-sensitive agriculture and food system programme. By the end of the course, you will be aware of key issues to consider at each step and be equipped with tools to address them.

4 hours and 30 minutes

Available in English

You will learn about

- Basic concepts of agriculture to nutrition impact pathways, and how to apply them through practical, scenario based examples.
- How to formulate nutrition-sensitive objectives and outcomes.
- How to target nutritionally vulnerable and prioritize interventions accordingly.
- How to define key elements of the implementation strategy, namely capacities and partnerships.
- How to design a monitoring system.
- Considerations for costing nutrition-related elements.

Who is the course for?

The course is designed to assist professionals from any fields related to agriculture and food systems that are involved in designing nutrition-sensitive programmes, investments and policies. This includes staff working in a wide range of organizations including national governments, regional organizations, international organizations, non-governmental organizations (NGOs), research institutes, universities, development agencies, and private sector.

Key partners

This work has been carried out by Food and Agriculture Organization of the United Nations (FAO) with the support of the European Union and the World Bank, and through a multi-stakeholder consultative process, which has involved practitioners, experts and researchers from governments, academia, United Nations (UN) agencies, NGOs and development partners.

FAO eLearning Academy

This course is available through the FAO eLearning Academy. Please visit the Academy and browse our extensive catalogue in multiple languages. Register once to access over 100 titles. All courses are available as a global public good for free.

How to access the course

1. Go to the e-learning Academy: elearning.fao.org
2. Register and log-in with your user name and password

 Registration is fast and easy
