

Transforming dryland forests and agrosilvopastoral systems

©FAO/Marco Perri

This course seeks to build the competencies needed for program and project managers, field practitioners and policy makers to apply a transformational sustainability approach to decision-making in the management of dryland forests and agrosilvopastoral production systems.

 3 hours 40 minutes

 Available in English

You will learn about

- Drylands and dryland food production systems.
- Challenges to drylands and agrosilvopastoral systems.
- The transformational approach to sustainability in drylands and agrosilvopastoral systems.
- The economic sustainability pillar of the approach and its three expected transformations.
- The social sustainability pillar of the approach and its three expected transformations.
- The environmental sustainability pillar of the approach and its three expected transformations.
