

Forests and transparency under the Paris Agreement

© FAO/Giulio Napolitano

The objective of this course is to learn about the Enhanced Transparency Framework (ETF) under the Paris Agreement. It will be useful to those wishing to understand the importance of forest-related data collection, analysis and dissemination in meeting the Enhanced Transparency Framework requirements.

1.5 hours

Available in English, French, Spanish and Chinese

You will learn about

Digital badge

- The importance of forests in achieving the goals of the Paris Agreement.
- The progressive changes in moving towards the transparency framework under the Paris Agreement, illustrating how this could be addressed in the forest sector.
- The principles and elements which guide the design and operation of a sustainable National Forest Monitoring System (NFMS).
- The importance of the NFMS to meet the requirement of the modalities, procedures and guidelines of the ETF.

Who is the course for?

Individuals who would especially benefit from taking this course include:

- Heads of national forest authorities or ministry.
- Climate change or forest officers.
- Students in forestry and environmental sciences.

Key partners

This course was authored and produced by the Food and Agriculture Organization of the United Nations (FAO) in collaboration with the United Nations Framework Convention on Climate Change (UNFCCC) and the Global Environment Facility (GEF).
