

Monitoring and evaluation of child labour in agriculture

© IFAD/Rindra Ramasomanana

This course demonstrates how strong monitoring systems of agricultural programmes can incorporate child labour indicators, suggesting useful strategies. It also provides methodologies to consider when evaluating and reporting on evidence that suggests child labour may have been impacted by an agricultural initiative.

1.5 hours

Available in English

You will learn about

- How to use a monitoring and evaluation (M&E) system to gather information
- The use of tools to monitor prevention, reduction and elimination of child labour in agricultural programmes
- Identifying challenges to monitor child labour in agriculture and define adequate actions
- Understanding what constitutes an evidence base to demonstrate changes in child labour in farming, fishing, livestock or forestry

Digital badge

Who is the course for?

The course will contribute to the capacity development of policy makers and advisors of agricultural related policy; agricultural programme designers and implementers; agricultural producer organizations; agricultural researchers; and agricultural statisticians who wish and need to know more about tackling child labour in agriculture.

Key partners

This course was developed by the Food and Agriculture Organization (FAO) in collaboration with the International Labour Organization (ILO). It was co-funded by the Kingdom of the Netherlands.

Goal of the programme is to:

- raise awareness about the importance of addressing child labour in the agricultural sector
- to provide concrete suggestions to be applied in real life agricultural policy and programming situations
