

Annex II: Degree of Dependence per Country – Supplementary Table 1

Supplementary Table 1. Degree of dependence per country on crops of “foreign” primary regions of diversity in national food supplies (calories, protein, fat, and food weight) and production systems (production quantity, harvested area, and production value) as a modeled mean between minimum and maximum dependence per country, 2009-2011. Raw minimum and maximum dependence values and modelled variance metrics are provided in Supplementary Table 2. Countries are listed by macro region as provided in Annex 2 of FAO (2010),³⁰ and then by eco-geographic region as designated in this analysis. Countries included in more than one region are listed in all pertinent regions.

MACRO REGION	REGION	COUNTRY	CALORIES	PROTEIN	FAT	FOOD WEIGHT	PROD QTY	HARV AREA	PROD VALUE
