THE FAO PUBLISHING PROGRAMME

As the leading UN agency for agricultural and rural development, FAO publishes print and electronic publications covering all fields of food and nutrition, agriculture, forestry, fisheries, the environment, and related aspects of economic and social development. FAO publishes in six official languages (English, French, Spanish, Arabic, Chinese and Russian), supports publishing of its titles in other languages, and engages in co-publishing projects worldwide.

HOW TO ORDER FAO PUBLICATIONS

FAO publications may be ordered directly from FAO by writing to: **publications@fao.org** Or via a network of distributors, agents and booksellers in more than 70 countries worldwide. For a full listing of FAO's global network of distributors, please see p. 68 of this catalogue. Terms and conditions of sale vary by distributor and country.

Publishing at FAO is going through a phase of transformation, as is the entire Organization. Priorities are now better defined and FAO is translating these into concrete actions through its five strategic objectives. By significantly strengthening the technical capacity of its regional, sub-regional and country offices, FAO can now better address the development priorities of its member countries.

For FAO publications, this means a more focused approach to what our readers need and want in line with the transformation taking place within the Organization.

This is an important year for publishing at FAO, for one specific reason: the new portal of the FAO Document Repository was launched successfully, bringing publications and official documents produced by FAO worldwide to readers free of charge. Our users now have the possibility to rate and comment on our published works, thereby interacting with us directly and moreover providing us and other users with valuable feedback on our publishing activities. As we continue to modernize and improve the functionality of this rich archive, we do so with a passionate commitment to keep providing the world with the best information available in agriculture, livestock, fisheries, food security, forestry, economic and social development, investment, natural resources, nutrition, policy assistance and development law.

A particularly important part of our strategy is to identify partners to reinforce our reach. We welcome institutional and commercial partners who wish to publish our titles as first editions or translations into other languages. Similarly, we invite civil society and private sector institutions interested in disseminating our publications to contact us to develop alliances and agreements.

In this year's catalogue you will notice that special attention has been given to publications related to nutrition. This is because FAO is the co-organizer of the Second International Conference on Nutrition (ICN2), a high-level event that will be hosted at FAO headquarters in Rome in November 2014. The Conference will provide the world with an opportunity to chart a better future in which all people are well nourished from food that is produced and consumed with sustainable systems. FAO's experts in nutrition and sustainable agriculture are working relentlessly to produce and disseminate the best and the most current information for this Conference in all possible ways. For the first time ever, FAO will launch an eBook Collection of nutrition-related publications, an important and useful resource for its clients.

It is our aim to continue to produce high-quality and relevant material worldwide. Again this year, we are excited to present a selection of publications that were produced entirely by our technical experts in FAO's country offices.

It is my pleasure to invite you to browse the FAO catalogue and identify publications that suit your interest. For your ease, you will find a Quick Response (QR) code under each title that when scanned with a mobile device, will take you directly to the online version of the publication immediately available for download.

FAO'S 2014 FLAGSHIP PUBLICATIONS

The State of World Fisheries and Aquaculture 2014

Opportunities and Challenges

This premier advocacy document is published every two years to provide policy-makers, civil society and those whose livelihoods depend on the sector a comprehensive, objective and global view of capture fisheries and aquaculture, including associated policy issues. This year's edition highlights the significant role that fisheries and aquaculture plays in eliminating hunger, promoting health and reducing poverty.

State of the World's Forests 2014

Enhancing the socioeconomic
benefits from forests

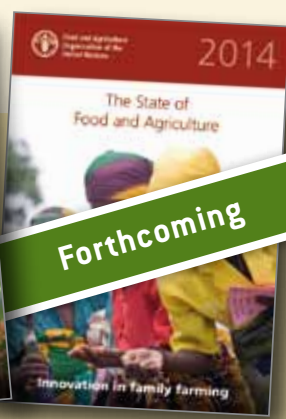

It is time for forestry to shift perspective from trees to people, both for data collection and policymaking. This year's edition of the State of the World's Forests argues that this will enable the development of the socioeconomic benefits from forests to meet the growing demands of society, while maintaining the integrity of the forest resource base.

Forthcoming

The State of Food Insecurity in the World 2014

Strengthening the enabling environment for food security and nutrition

In this edition of FAO's State of Food Insecurity in the World, estimates indicate that the trend in global hunger reduction continues: about 805 million people were estimated to be chronically undernourished in 2012-14, down by more than 100 million over the last decade and by 209 million compared to 1990/92. This means that the Millennium Development Goal hunger target of halving the proportion of undernourished people by 2015, is within reach. Yet today, about one in every nine people in the world still do not have enough food to conduct an active and healthy life.

The State of Food and Agriculture 2014

Innovation in family farming

More than 500 million family farms manage most of world's agricultural land and produce most of its food. Family farms are very diverse, including many who are poor with low levels of productivity. All of them must become more innovative to ensure sustainable productivity growth. The new State of Food and Agriculture analyses family farms and the role of innovation in ensuring global food security, poverty reduction and environmental sustainability.

Building a common vision for sustainable food and agriculture

Principles and approaches

This report is aimed primarily at policy makers and others who make or influence national and institutional decisions and actions. It proposes a common vision and coordinated approach towards sustainable food and agriculture that is comprehensive and, as well as responsive to the needs and expectations of Member Countries. The approach presented in this report is the result of extensive consultations between FAO experts and external specialists in crops, livestock, forestry, fisheries and natural resources.

Bycatch in longline fisheries for tuna and tuna-like species

A global review of status and mitigation measures

This publication is the third in a series of FAO Fisheries and Aquaculture Technical Papers reviewing bycatch in global tuna and longline fisheries. Its scope is defined taxonomically to comprise only non-tuna and non-tuna-like species, i.e. elasmobranchs, sea turtles, seabirds, marine mammals and other (non-target) bony fishes.

Developing sustainable food value chains – Guiding principles

Aimed at policy-makers, project designers and field practitioners, this publication provides the conceptual foundation for a new set of FAO handbooks on sustainable food value chain development. It defines the concept of a sustainable food value chain, presents a development paradigm that integrates the concepts of sustainability and value addition, highlights ten guiding principles, and discusses the potential and limitations of the approach. In doing so, this handbook makes a strong case for placing sustainable food value chain development at the heart of any strategy aimed at reducing poverty and hunger.

Genetic considerations in ecosystem restoration using native tree species

This study provides fundamental information for the achievement of ecosystem restoration using native tree species. It draws attention to the importance of embedding genetic considerations into restoration activities, an aspect which is often overlooked both by restoration scientists and practitioners, but is nonetheless crucial to rebuilding resilient landscapes and ecosystems.

Good emergency management practice: The essentials

A guide to preparing for animal health emergencies

A disease emergency is one of the most challenging situations a veterinary service can confront. Veterinary services must be well prepared to deal with such emergencies quickly and cost-effectively. This manual sets out in a systematic way the elements required to achieve an appropriate level of preparedness for any disease emergency in animals. In particular it focuses on the control of transboundary animal diseases. Some of the principles presented may also be helpful in preparing for food safety, zoonotic and even non-infectious disease emergencies.

Lineamientos de Política para el Desarrollo Sostenible del Sector Ganadero

La ganadería ha sido uno de los sectores de la agricultura que ha crecido más rápido durante la última década, por estar inmersa en lo que se ha denominado como la “revolución ganadera” asociada al rápido incremento en la demanda de productos de origen animal. El presente documento tiene como objetivo ofrecer elementos técnicos que sirvan como insumo para el diseño de políticas públicas basadas en evidencias empíricas. Se espera a través del mismo, facilitar al interior de las plataformas nacionales de desarrollo ganadero el desencadenamiento de procesos de diálogo público-privados, encaminados a la elaboración de políticas de largo plazo para un desarrollo más sostenible y competitivo del sector ganadero.

Manual técnico para la construcción y el uso de los silos metálicos familiares para almacenar cereales y leguminosas de grano

El Manual técnico para la construcción y el uso de los silos metálicos familiares para almacenar cereales y leguminosas de grano presenta de forma didáctica y sencilla las instrucciones para la construcción y uso de diversos tipos de silos familiares, con capacidad de entre 0,12 m³ y 4,2 m³ (aproximadamente entre 120 y 4 000 kg). La contribución de este tipo de silos a la seguridad alimentaria, a la satisfacción de los objetivos del milenio y al bienestar de los pequeños agricultores es sumamente importante, especialmente en épocas de crisis agrícolas causadas por numerosos factores externos, incluyendo problemas financieros.

Panorama de la Seguridad Alimentaria y Nutricional en América Latina y el Caribe: 2014

El Panorama de la Seguridad Alimentaria y Nutricional en América Latina y el Caribe analiza el estado y las perspectivas de la seguridad alimentaria en la región, sus dimensiones de acceso, utilización, disponibilidad y estabilidad, identificando las tendencias en la evolución de la lucha contra el hambre a nivel regional y de los países. El Panorama 2014 hace un balance de las acciones públicas emprendidas por los gobiernos de la región para avanzar hacia el logro de los Objetivos de Desarrollo Milenio, a un año de la meta fijada por la comunidad internacional, que les han permitido avanzar a un ritmo constante en la erradicación del hambre, la malnutrición y la pobreza.

Save and Grow: Maize, Rice and Wheat

A policymaker's guide to the sustainable intensification of smallholder production

FAO's best-selling 2011 publication, *Save and Grow*, proposed a new paradigm of agriculture, one that is both highly productive and environmentally sustainable. This new publication looks at the application of "Save and Grow" farming systems, practices and technologies to the world's main food security crops – maize, rice and wheat. It shows how eco-friendly farming innovations can help farmers meet future demand for those cereals while building resilience to climate change, conserving natural resources, reducing negative impacts on the environment and enhancing natural capital and the flow of ecosystem services. The publication will assist policymakers guiding the transition to sustainable agriculture.

Small-scale aquaponic food production

Aquaponics is the integration of aquaculture and soil-less culture in a closed production system. This manual aquaponics for smallscale production predominately for home use. The manual is divided into nine chapters and seven annexes, with each chapter dedicated to an individual module of aquaponic. The target audience for this manual is agriculture extension agents, regional fisheries officers, non-governmental organizations, community organizers, governmental ministers, companies and singles– worldwide. The intention is to bring a general understanding of aquaponics to people who previously may have only known about one aspect.

World mapping of animal feeding systems in the dairy sector

Information on feeding systems is necessary for estimating the environmental impact of the livestock sector; for developing diets and feeding strategies to reduce the carbon footprint and to optimize milk composition; for enhancing animal productivity, health and welfare; for increasing the quality and safety of animal products; and for improving economic sustainability of milk production. This report builds a knowledge foundation for animal feeding systems to serve as a valuable resource for the dairy sector and connected chain partners.

A policymaker's guide to crop diversification:

The case of the potato in Kenya

While aimed primarily at policymakers in Kenya, the guide is also of use to decision-makers in other countries of Eastern and Central Africa. It will help to realize the potato's full potential as a high-value crop in response to emerging opportunities, such as changes in consumption pattern and the resulting need for value addition due to rapid urbanization, and to potential threats, including climate change and food price surges causing upheaval in international food markets.

Apple-producing family farms in South Tyrol

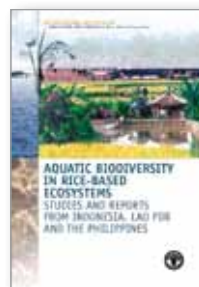

This innovative case study looks at small farmers in South Tyrol who currently produce 50%, 15% and 2% of apples on the Italian, European and global markets respectively. The cooperative culture, the diversity of services, the multiple actors and their changing roles within the system offer a good opportunity for learning about the dynamics of agricultural innovation. This paper presents the evolution of this agricultural innovation system, and analyses the triggers and the drivers of innovation in the apple production sector in South Tyrol.

Forest Management and Conservation Agriculture

Experiences of smallholder farmers in the Eastern Region of Paraguay

.....

The publication examines in great detail the design and implementation of a rural development project for smallholder farmers in Paraguay. Over a period of seven years, from 2003 to 2010, the project applied the basic concepts of conservation agriculture, forestry and agroforestry benefiting 17 thousand farm families in the Eastern Province of the country. The book gives a clear-eyed analysis of the lessons learnt and the factors for success and failure and is an invaluable resource for those contemplating similar projects in the future.

Impact of international voluntary standards on smallholder market participation in developing countries

A review of the literature

Over the past 20 years, international voluntary standards have gained prominence in global trade. These standards are developed and used by both private and public actors to ensure quality, food safety, social protection and environmental conservation that go beyond mandatory regulation. This publication presents the results of a literature review conducted by FAO in 2012 on the impact of voluntary standards on smallholders' ability to participate in markets.

Save and Grow: Cassava

A guide to sustainable
production intensification

This guide is the first on the practical application of FAO's "Save and Grow" model of agriculture to specific smallholder crops and farming systems. It comes as cassava production intensifies worldwide, and growers shift from traditional cultivation practices to monocropping, higher-yielding genotypes, and greater use of agrochemicals. The guide shows how ecosystem-based "Save and Grow" approaches and practices can help tropical developing countries avoid the risks of unsustainable intensification, while realizing cassava's potential for producing higher yields, alleviating hunger and rural poverty, and contributing to national economic development.

Animal Genetic Resources

An international journal

Animal Genetic Resources is published by Cambridge University Press under the auspices of FAO's Animal Genetic Resources Branch. The journal provides an international forum for the publication of papers related to the management of animal genetic resources for food and agriculture. It covers the following areas: phenotypic and molecular characterization; surveying and monitoring; development (genetic improvement); sustainable use; conservation; capacity-building in livestock-keeping and pastoralist communities; and policies and institutions. Papers are published in English, French or Spanish, with abstracts in the other two languages

Atlas of trends in pastoral systems in the Sahel 1970-2012

Information system on pastoralism in the Sahel

This atlas summarizes the available information on the transformations of pastoral systems in the Sahel, as collected in the context of the SIPSA (Information System on Pastoralism in the Sahel) and other initiatives. Building on an analysis of information needs carried out in the context of SIPSA, the atlas analyzes major trends in pastoral systems, pastoral communities and their environment. A tool to help decision-making based on objective grounds, the atlas shall contribute to improving governance related to Sahelian pastoralism.

The feed analysis laboratory: establishment and quality control

Setting up a feed analysis laboratory, and implementing a quality assurance system compliant with ISO/IEC 17025:2005

Reliable assessment of feed quality is crucial for sustainable development of the livestock sector. This document presents the sequence of activities for establishing a Feed Quality Analysis Laboratory - from initial planning, building and layout; through hiring suitable staff and selecting methods and equipment; and culminating in accreditation, based on an estimated four-year time frame. The document can assist laboratory analysts, lab managers, researchers, students and teachers.

World livestock 2013

Changing disease landscapes

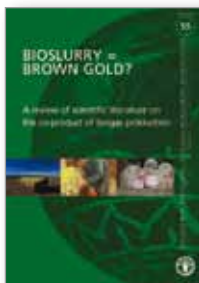

The World Livestock 2013 report argues that a comprehensive approach to the promotion of global health is needed to face the complexities of the changing disease landscapes, giving greater emphasis to agro-ecological resilience, protection of biodiversity and efficient use of natural resources. This aims at ensuring safer food supply chains, particularly in areas most affected by poverty and animal diseases.

Biotechnologies at Work for Smallholders

Case studies from developing countries in crops, livestock and fish

.....

This book documents a unique series of 19 case studies where agricultural biotechnologies were used to serve the needs of smallholders in developing countries. They cover different regions, production systems, species and underlying socio-economic conditions in the crop, livestock and aquaculture/ fisheries sectors. The final chapter of the book summarizes the background, challenges, results and lessons learned from the 19 case studies.

FAO's BEFS Bioenergy and Food Security Approach

.....

Currently nearly one in five people around the world do not have access to modern energy services and approximately three billion people rely on wood, coal, charcoal or animal waste for cooking and heating. This is a major barrier to eradicating poverty. Under the Sustainable Energy for All initiative of the UN Secretary General, action is being taken to achieve universal access to modern energy services by 2030, improve energy efficiency and increase the share of renewable energy in the global energy mix.

Climate change

Climate change and agriculture in Jamaica

Agriculture sector support analysis

Increases in the intensity and frequency of climate related natural hazards, increasing rainfall variability, droughts and floods combined with fragile ecosystems and coastal zones all contribute to Jamaica's overall vulnerability to climate change. The scope of the study focused on broader policy directions, technical alternatives and investment priorities in relation to climate change adaptation.

Evidence-based assessment of the sustainability and replicability of integrated food-energy systems

A guidance document

This publication presents an analytical framework which serves to screen different integrated food-energy systems (IFES) options systematically and helps to define which IFES systems are sustainable and replicable. In concrete terms, this framework is envisioned as a guidance document that allows its user to assess which factors make an IFES truly sustainable and which need to be considered when replicating such a system - be it a pilot project, a business innovation or a research experiment.

Facing the challenges of climate change and food security

The role of research, extension and communication for development

The report is based on case studies from Bangladesh (Sulaiman, 2010), Bolivia (Pafumi and Ulloa, 2010), DR Congo (Mbaye, 2010) and Ghana (Adjei-Nsiah and Dormon, 2010) which were carried out to assess needs and gaps in the provision of innovation support services for climate change adaptation. The main message from the study is that not only is technical change for farm-level adaptation and mitigation needed, but also a change of policy and institutional regimes that govern agricultural production, value chains and natural resource management.

CEDAW - A tool for gender-sensitive agriculture and rural development policy and programme formulation

Agricultural policies should redress gender inequalities to ensure that development interventions in the sector can achieve enduring positive impacts on the lives and economic potential of rural women, men, girls and boys. One powerful instrument for promoting realization of the rights and potential of rural women and girls is the *Convention on the Elimination of All Forms of Discrimination against Women* (CEDAW). The purpose of these guidelines is to provide guidance on how FAO and national ministries of agriculture can support and use CEDAW at the country level.

Proceedings of the Second Ministerial Meeting on International Food Prices

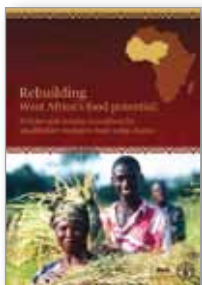

Although prices of cereals and oilseeds on international markets have fallen from the peaks reached in July 2012, they remain high and vulnerable to supply shocks. There are, therefore, continuing concerns about the challenges posed by food prices for global food security. A first meeting in 2012 on Food Price Volatility was held in response to the third spike in international grain prices in five years. Based on the success of that first Ministerial Meeting, it was agreed to repeat the event in 2013.

The State of Food and Agriculture 2012

Food Systems for Better Nutrition

Malnutrition - in the form of undernutrition, micronutrient deficiencies, and overweightness and obesity - imposes unacceptably high economic and social costs on countries at all income levels. The causes of malnutrition are complex, yet all forms of malnutrition share one common feature: nutritionally inappropriate diets. The State of Food and Agriculture 2012 makes the case that healthy diets and good nutrition begin with food and agriculture.

Voluntary guidelines to support the progressive realization of the right to adequate food in the context of national food security

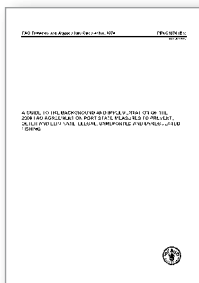

The objective of the Voluntary Guidelines is to provide practical guidance to states in their implementation of the progressive realization of the right to adequate food in the national context of food security, in order to achieve the goals of the 1996 World Food Summit Plan of Action. The Voluntary Guidelines, adopted by the FAO Council in November 2004, represent the first attempt by governments to interpret an economic, social and cultural right and to recommend actions to be undertaken for this realization.

Aquaculture development

4. Ecosystem approach to aquaculture

An ecosystem approach to aquaculture is a strategy for the integration of the activity within the wider ecosystem such that it promotes sustainable development, equity and resilience of interlinked social-ecological systems. The main objective of the guidelines is to assist countries, institutions and policy-makers in the development and implementation of a strategy to ensure the sustainability of the aquaculture sector, integration of aquaculture with other sectors and its contribution to social and economic development.

Construction and installation of hexagonal wooden cages for fish farming

A technical manual

This document is a practical guide that provides a list and technical details of the materials to be used for constructing a hexagonal wooden cage, together with its mooring system, for fish farming within the framework of artisanal aquaculture. The instructions for assembling the different components are illustrated in detail, and the technical guidelines for cage installation at the farming site are also described. The basic knowledge and instructions provided in this manual are intended for those working in aquaculture development.

Developing new approaches to global stock status assessment and fishery production potential of the seas

To monitor ecosystem health, it is necessary to conduct ecosystem-level assessments that take into consideration both targeted and non-targeted species, interspecies interactions, and other factors that cannot be determined by looking at each stock in isolation. With these objectives, FAO commissioned a study called Developing New Approaches to Global Stock Status Assessment and Fishery Production Potential of the Seas. This circular presents the results of the study.

Feeding and feed management of Indian major carps in Andhra Pradesh, India

This study reviews the aquaculture of Indian major carps with special reference to current feeding and feed management practices in Andhra Pradesh, India. It also assesses management practices used under polyculture conditions with other species groups. It identifies constraints to Indian major carp production and characterises research and development needs.

Fish identification tools for biodiversity and fisheries assessments

Review and guidance for decision-makers

This review provides an appraisal of existing, state-of-the-art fish identification (ID) tools (including some in the initial stage of their development) and shows their potential for providing the right solution in different real-life situations. The ID tools reviewed are: use of scientific experts (taxonomists) and local experts, taxonomic reference collections, image recognition systems, field guides based on dichotomous keys; interactive electronic keys (e.g. IPOFIS), morphometrics (e.g. lPez), scale and otolith morphology, genetic methods (Single nucleotide polymorphisms (SNPs) and Barcode (BOL)) and Hydroacoustics.

Fisheries and aquaculture in Tajikistan: review and policy framework

This FAO Fisheries and aquaculture Circular has three main aims. First, it is intended to inform those interested in fisheries and aquaculture in Tajikistan about the current situation with regard to fishery resources and their utilization in the country. Second, it attempts to provide background information in support of the national sectoral policy and strategy formulation process. Thirdly, it may serve as guidance for future interventions by the government and donors in support of the sustainable development and management of the sector.

Strengthening organizations and collective action in fisheries

A way forward in implementing the international guidelines for securing sustainable small-scale fisheries

This document provides a summary of the workshop held in Rome, 18-20 March 2013. The workshop anticipated the implementation of the small-scale fisheries (SSF) Guidelines by looking at the diversity of existing organizations and collective action in SSFs, analyzing their strengths and weaknesses, and proposing elements for a capacity development strategy to reduce poverty while promoting responsible fisheries. The document contains a summary of the plenary presentations and discussions, the working group outcomes and is complemented by the full text of two background papers.

The State of World Fisheries and Aquaculture 2014

Opportunities and Challenges

This new edition of The State of World Fisheries and Aquaculture (SOFIA) highlights the significant role that fisheries and aquaculture plays in eliminating hunger, promoting health and reducing poverty. Never before have people consumed so much fish or depended so greatly on the sector for their well-being. Fish is extremely nutritious - a vital source of protein and essential nutrients, especially for many poorer members of the global community. Fisheries and aquaculture is a source not just of health, but also of wealth.

The vulnerability of fishing-dependent economies to disasters

This circular examines the vulnerability of fishing-dependent communities to natural disasters. The objective was to identify countries that are particularly vulnerable to disasters, but also those that are less resilient. The circular concludes that the fishery sectors of African and Southeast Asian countries are most vulnerable to disasters, according to both frequency and mortality exposure indicators, fishery-dependence, and capacity to adapt. Recommendations are made with respect to strengthening understanding of vulnerability measurement.

Value chain dynamics and the small-scale sector

Policy recommendations for small-scale fisheries and aquaculture trade

This technical paper focuses primarily on price transmissions in small-scale and large-scale fishery and aquaculture value chains in 14 developed and developing countries. Although the study is focused on the small-scale sector, both the small-scale and large-scale sectors were analysed in order to demonstrate differences between the two. The document outlines the general findings and policy recommendations that emerged as key themes across all value chains analysed.

FAO

A KEY PLAYER IN NUTRITION KNOWLEDGE GLOBALLY

Launching the
FAO eBooks Nutrition Collection
a compilation of over 3 000 pages
of information on food and
nutrition, as written by the
FAO experts

The Collection includes:

- Guidelines and tools, expert consultations and lessons on healthy nutrition
- Some content available in multiple languages
- Easy offline access and all the functionalities of eBooks

Appropriate food packaging solutions for developing countries

This revised edition, dated 2014, contains a new section on investment opportunities in developing countries. The study assesses the state of packaging and packaging technologies in developing countries, with the challenge of global food losses and the potential for agri-food systems as the backdrop. The purpose of the exercise is to identify packaging solutions in developing countries, within the limits of prevailing levels of development and conditions, and in an attempt to make better use of the locally available packaging materials.

Codex Alimentarius Commission Procedural Manual

Twenty-first edition

The Procedural Manual of the Codex Alimentarius Commission is intended to help Member Governments participate effectively in the work of the joint FAO/WHO Food Standards Programme. The manual is particularly useful for national delegations attending Codex meetings and for international organizations attending as observers. It sets out the basic Rules of Procedure, procedures for the elaboration of Codex standards and related texts, basic definitions and guidelines for the operation of Codex committees.

Compendium of food additive specifications

Joint FAO/WHO Expert Committee on Food Additives 77th Meeting 2013

The specification monographs provide information on the identity and purity of food additives used directly in foods or in food production. The main three objectives of these specifications are to identify the food additive that has been subjected to testing for safety, to ensure that the additives are of the quality required for use in food or in processing and to reflect and encourage good manufacturing practice. This publication and other documents produced by JECFA contain information that is useful to all those who work with or are interested in food additives and their safe use in food.

Food losses and waste in the context of sustainable food systems

A Report by the High Level Panel of Experts on Food Security and Nutrition - June 2014

Although accurate estimates of losses and waste in the food system are unavailable, the best evidence to date indicates that globally around one-third of the food produced is lost or wasted along the food chain, from production to consumption. This policy-oriented report from the High Level Panel of Experts on Food Security and Nutrition (HLPE) presents a synthesis of existing evidence about the causes of food losses and waste and suggests action to reduce them in order to improve food and nutrition security and the sustainability of food systems.

Food waste footprint

Impacts on natural resources

This FAO study provides a global account of the environmental footprint of food waste along the food supply chain, focusing on impacts on climate, water, land and biodiversity. A model has been developed to answer two key questions: what is the magnitude of food waste impacts on the environment; and what are the main sources of these impacts, in terms of regions, commodities, and phases of the food supply chain involved - with a view to identify “environmental hotspots” related to food waste.

Guidelines for assessing nutrition-related knowledge, attitudes and practices

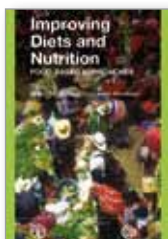

The manual is written for people in charge of planning, implementing and evaluating food security and nutrition projects; these include project managers, nutritionists, health workers, planning and evaluation specialists and many others. The manual includes definitions and key indicators for nutrition and health-related knowledge, attitudes and practices. It provides useful guidance for planning and conducting a knowledge, attitude and practices (KAP) survey, and for analysing and reporting the survey results.

Milk and dairy products in human nutrition

This publication is unique in drawing together information on nutrition, and dairy-industry development, providing a rich source of useful material on the role of dairy products in human nutrition and the way that investment in dairy-industry development has changed. The book draws together the threads of the two stories, on nutrition and on dairy-industry development, by considering key trends that emerge from the information presented and highlighting the issues that arise from them. It discusses the implications of these findings for the future of the dairy sector, particularly in developing countries.

Multicriteria-based ranking for risk management of food-borne parasites

This report presents the results of a global ranking of food-borne parasites from a food safety perspective. It also provides an overview of the current status of knowledge of the ranked parasites in food and their public health and trade impact, and provides advice and guidance on the parasite-commodity combinations of particular concern, the issues that need to be addressed by risk managers, and the risk management options available to them. It documents the ranking process used to facilitate its adoption at regional, national, or local levels.

Toolkit: Reducing the Food Waste Footprint

One-third of all food produced in the world is lost or wasted from farm to fork, according to estimates calculated by FAO (2011). The aim of the Toolkit is to showcase concrete examples of good practices for food loss and waste reduction, while pointing to information sources, guidelines and pledges favoring food waste reduction. The inspirational examples featured throughout this Toolkit demonstrate that everyone, from individual households and producers, through governments, to large food industries, can make choices that will ultimately lead to sustainable consumption and production patterns, and thus, a better world for all.

Voluntary Standards for Sustainable Food Systems: Challenges and Opportunities

A Workshop of the FAO/UNEP Programme on Sustainable Food Systems

The sessions of the workshop considered voluntary standards from different points of view in order to better understand and address the needs of the various stakeholders in order to facilitate the uptake and scaling up of voluntary standards for sustainable food systems. This approach is grounded on the idea that for voluntary standards to work for sustainably, they have to work for all stakeholders.

Climate change guidelines for forest managers

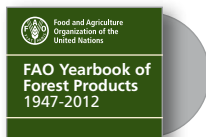

These guidelines have been prepared to assist forest managers to better assess and respond to climate change challenges and opportunities at the forest management unit level. The actions they propose are relevant to all kinds of forest managers - such as individual forest owners, private forest enterprises, public-sector agencies, indigenous groups and community forest organizations. They are applicable in all forests types and regions and for all management objectives. This document complements a set of guidelines prepared by FAO in 2010.

Multiple-use forest management in the humid tropics

Opportunities and challenges for sustainable forest management

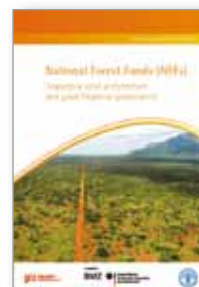

This paper reports on three regional assessments carried out to identify and draw lessons from on-the-ground initiatives in multiple-use forest management in the Amazon Basin, the Congo Basin and Southeast Asia. In all three regions, information was collected through interviews with country-based forestry experts, forest managers and technicians. A complementary, Web-based questionnaire further examines the reasons for the successes and failures of multiple-use forest management initiatives.

National Forest Funds (NFFs)

Towards a solid architecture and good financial governance

In recent years, National Forest Funds (NFFs) have regained international attention as potential solutions to improve financial governance and the administration of funds in the forestry sector. NFFs are financing mechanisms solely dedicated to improving the conservation and sustainable use of forest resources. The publication describes the key elements of NFFs, discusses a set of elements that serve as a starting point for developing a fund performance assessment methodology and illustrates how different funds can be compared and evaluated.

Rediscovering Wood: the key to a sustainable future

Proceedings of the Art and Joy of Wood - Conference 19-22 October 2011, Bangalore, India

The Conference was a global event to celebrate the International Year of Forests. This was organized to help the participants understand the outlook for wood products and contribute to develop strategies for future sustainable development. Alongside the technical sessions, on all four days, a commercial exhibition and wood products display was adjacent to the conference venue, here presented in these proceedings.

State of Mediterranean Forests 2013

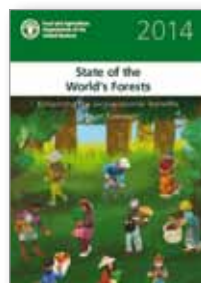

Forest ecosystems and other wooded lands are an important component of landscapes in the Mediterranean region, contributing significantly to rural development, poverty alleviation and food security. They are sources of wood, cork, energy, food and incomes, and they provide important ecosystem services such as biodiversity conservation, soil and water protection, recreation and carbon storage. They are crucial for many of the region's economic sectors, such as food supply, agriculture, soil and water conservation, drinking water supply, tourism and energy.

State of the World's Forests 2014

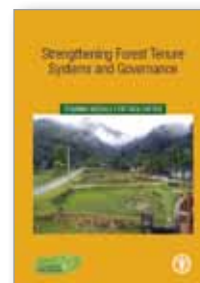

Forests, trees on farms, and agroforestry systems play a crucial role in the livelihoods of rural people. They have tremendous potential to contribute to sustainable development and to a greener economy. Yet, clear evidence of this has been lacking. This evidence is critical to inform policies on forest management and use, and to ensure that the benefits from forests are recognized in the post-2015 development agenda. This edition of the State of the World's Forests addresses this knowledge gap by systematically gathering and analysing available data on forests' contributions to people's livelihoods, food, health, shelter and energy needs.

The State of Forest Genetic Resources in the SEC Region

The Republic of Azerbaijan
Country Report

Forests are among the most important repositories of terrestrial biological diversity. They provide a wide range of products and services to people throughout the world. Forest trees and other plants help support many other organisms, and have developed complex mechanisms to maintain high levels of genetic diversity. This diversity is the fundamental basis for the evolution of forest tree species and for their adaptation to environmental changes. Conserving forest genetic resources is therefore vital, as they are a unique and irreplaceable resource.

Unasyuva 240

300 years of sustainable forestry

This edition of Unasyuva opens with an article looking back 300 years, and it finishes with one that looks forward an equal distance. Blaser and Gregersen speculate on the future role of forests, given climate change and expected increases in population and resource consumption. The fate of humanity, they say, rests in large measure on how we deal with forests. Optimistically, they believe that, 300 years from now, forests will be highly valued by the global community, as will their managers. There will be many challenges, and forest managers will need a wide range of skills.

Land and water

Adapting to climate change through land and water management in Eastern Africa

Results of pilot projects in Ethiopia, Kenya and Tanzania

This publication presents the results and lessons learned from the FAO-Sida supported pilot project “Strengthening capacity for climate change adaptation in land and water management” in Ethiopia, Kenya and Tanzania. The project proposed an integrated package of approaches that addressed the drivers of vulnerability and targeted climate change impacts. It focused on technologies that improve soil health and facilitate water conservation, the diversification of the sources of livelihood and income, and the strengthening of local institutions.

Governing land for women and men

A technical guide to support the achievement of responsible gender-equitable governance of land tenure

Gender equality is one of the ten core principles of the Voluntary Guidelines on the Responsible Governance of Tenure of Land, Fisheries and Forests in the Context of National Food Security. This guide aims to assist in its implementation through the achievement of responsible gender-equitable governance of land tenure. It focuses on equity and on how land tenure can be governed in ways that address the different needs and priorities of women and men. The guide provides advice on mechanisms, strategies and actions that can be adopted to improve gender equity in the processes, institutions and activities of land tenure governance.

Respecting free, prior and informed consent

Practical guidance for governments, companies, NGOs, indigenous people and local communities in relation to land acquisition

Marginalized social groups are particularly at risk, including indigenous peoples, other customary landowners, women, lower-caste people and ethnic minorities. This technical guide on respecting free, prior and informed consent (FPIC) sets out practical actions for government agencies to respect and protect FPIC and for civil society organizations, land users and private investors globally to comply with their responsibilities in relation to FPIC.

Plant production and protection

Agricultural Mechanization in Sub-Saharan Africa

Guidelines for preparing a strategy

The manual work carried out by farmers and their families is often both arduous and time consuming and in many countries this is a major constraint to increasing agricultural production. Such day-to-day drudgery is a major contributory factor in the migration of people, particularly the young, from the countryside to seek the prospect of a better life in the towns and cities. This document provides guidelines on the development and formulation of an agricultural mechanization strategy and forms part of FAO's approach to sustainable production intensification.

Genebank Standards for Plant Genetic Resources for Food and Agriculture

Well-managed genebanks both safeguard genetic diversity and make it available to breeders. The Genebank Standards for Plant Genetic Resources for Food and Agriculture lay down the procedures for conserving plant genetic resources. These voluntary standards set the benchmark for current scientific and technical best practices, and support key international policy instruments for the conservation and use of plant genetic resources.

Good Agricultural Practices for greenhouse vegetable crops

Principles for Mediterranean climate areas

This publication capitalizes on the experience of scientists from the North Africa and Near East countries, in collaboration with experts from around the world, specialized in the different aspects of greenhouse crop production. It provides a comprehensive description and assessment of the greenhouse production practices in use in Mediterranean climate areas that have helped diversify vegetable production and increase productivity.

Guidance on weed issues and assessment of noxious weeds in a context of harmonized legislation for production of certified seed

This manual is a technical support to regional harmonization of seed regulations and provides information to crop protectionists, seed specialists and policy makers on noxious weeds not acceptable in certified seed lots. Noxious weeds in production of certified seeds should be anticipated and avoided in a context where globalization of trade has favored spread of many invasive alien plants, displacing native species and taking land out of production in many countries.

Herramientas CAPFITOGEN

Fortalecimiento de las Capacidades en Programas Nacionales de Recursos F de América Latina – Versión 1.2

Bajo el auspicio del Tratado Internacional sobre los Recursos Fitogenéticos para la Alimentación y la Agricultura (TIRFAA) y la Agencia Española de Cooperación Internacional para el Desarrollo (AECID), entre se desarrollaron dos talleres para la implementación del TIRFAA en el grupo de los países de América Latina y el Caribe (GRULAC) en Cartagena de Indias (Colombia, julio agosto de 2008) y La Antigua (Guatemala, agosto de 2010). El éxito de esta actividad demostró la efectividad de este tipo de talleres en contribuir a la implementación de los objetivos del TIRFAA dentro de la comunidad de países GRULAC.

Identifying Benefit Flows

Studies on the Potential Monetary and Non-Monetary Benefits Arising from the International Treaty on Plant Genetic Resource for Food and Agriculture

This publication compiles five studies and provides an overview of the conceptual bases for assigning monetary and non-monetary values to plant genetic resources for food and agriculture. It also constitutes the first steps towards a projection of benefit flows over time. It provides an overview of both the conceptual bases for assigning economic values (monetary and non-monetary) to plant genetic resources for food and agriculture, and the existing methodologies for establishing such values.

Mechanization for Rural Development

A review of patterns and progress from around the world

This book gives a wide-ranging perspective on the present state of mechanization in the developing world, and, as such, constitutes a solid platform on which to build strategies for a sustainable future. Farm mechanization forms an integral plank in the implementation of sustainable crop production intensification methodologies. This means that the protection of natural resources and the production of ecosystem services go hand-in-hand with intensified production practices.

Pesticides residues in food 2013

Joint FAO/WHO Meeting on Pesticides Residues

The annual Joint Meeting of the FAO Panel of Experts on Pesticide Residues in Food and the Environment and the WHO Core Assessment Group on Pesticide Residues was held in Geneva, Switzerland, from 17 to 26 September 2013. This report contains information on ADIs, ARfDs, maximum residue levels, and general principles for the evaluation of pesticides. The recommendations of the Joint Meeting, including further research and information, are proposed for use by Member governments of the respective agencies and other interested parties.

The funding strategy of the International Treaty

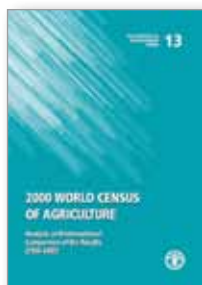

This is the third in a series of educational modules being developed under the coordination of the Secretariat of the International Treaty to strengthen capacities for effective implementation among its stakeholder groups. The educational modules are aimed at all stakeholder groups of the International Treaty, including policy makers and their staff, civil servants, genebank staff, plant breeders, farmers' organizations and other civil society organizations. They are also designed as information and awareness raising materials for the use of media, academia, prospective donors and other interested institutions.

2000 World Census of Agriculture

Analysis and International Comparison of the Results (1996-2005)

The Programme for the 2000 World Census of Agriculture was the sixth prepared by FAO for encouraging countries to undertake an agricultural census with standardized international concepts, definitions and methodologies. The programme covered the censuses carried out during the decade (1996-2005). About 122 countries carried out an agriculture census during the decade and 114 countries made available their census reports to FAO.

Agriculture and Food Security Statistics of the Least Developed Countries, Landlocked Developing Countries and Small Island Developing States

Special Issue

In a similar but wider scope than the previous special issue produced in 2011, this updated Special Issue includes information not only for the Least Developed Countries (LDCs), but also for all Landlocked Developing Countries (LLDCs) and Small Island Developing States (SIDS). The current issue presents a compilation of up-to-date available agricultural statistics covering the general nature of the agricultural sector in LDCs, LLDCs and SIDS ranging across the crops, livestock, forest and fisheries sub-sectors.

Pulp and Paper Capacities

Survey 2012-2017

The annual FAO survey of world pulp and paper capacities is based on figures received from correspondents in many countries. A computer questionnaire was used in the enquiry. The survey features country tables for pulp and paper, and tables showing volume of production capacity by country, for each product and product aggregate code and production tables by country.

Food and Agriculture Organization
of the United Nations

OUR PRIORITIES

The FAO Strategic Objectives

Achieving FAO's goals to end hunger and poverty is a challenging and complex task. Today, thanks to major changes in how we do business, FAO is a fitter, flatter and more flexible organization, whose activities are driven by five strategic objectives. The new and improved FAO has a real chance to win the battle against hunger, malnutrition and rural poverty.

Help eliminate hunger, food insecurity and malnutrition

We contribute to the eradication of hunger by facilitating policies and political commitments to support food security and by making sure that up-to-date information about hunger and nutrition challenges and solutions is available and accessible.

Make agriculture, forestry and fisheries more productive and sustainable

We promote evidence-based policies and practices to support highly productive agricultural sectors (crops, livestock, forestry and fisheries), while ensuring that the natural resource base does not suffer in the process.

Reduce rural poverty

We help the rural poor gain access to the resources and services they need – including rural employment and social protection – to forge a path out of poverty.

Enable inclusive and efficient agricultural and food systems

We help to build safe and efficient food systems that support smallholder agriculture and reduce poverty and hunger in rural areas.

Increase the resilience of livelihoods from disasters

We help countries to prepare for natural and human-caused disasters by reducing their risk and enhancing the resilience of their food and agricultural systems.

Index of titles

2000 World Census of Agriculture - Analysis and International Comparison of the Results (1996-2005)	65
2000 World Census of Agriculture - Methodological Review (1996-2005)	65
A policymaker's guide to crop diversification: The case of the potato in Kenya	12
A technical guide to support the implementation of the Voluntary Guidelines on the Responsible Governance of Tenure of Land, Fisheries and Forests in the Context of National Food Security - Preliminary Version, September 2013	31
Acuerdo sobre Medidas del Estado Rector del Puerto Destinadas a Prevenir, Desalentar y Eliminar la Pesca Ilegal, no Declarada y no Reglamentada: antecedentes y guía de aplicación	29
Adapting to climate change through land and water management in Eastern Africa - Results of pilot projects in Ethiopia, Kenya and Tanzania	58
Age Determination of Elasmobranch, with special reference to Mediterranean species: A Technical Manual	29
Agricultural Mechanization in Sub-Saharan Africa - Guidelines for preparing a strategy	61
Agriculture and Food Security Statistics of the Least Developed Countries, Landlocked Developing Countries and Small Island Developing States - Special Issue	65
Animal Genetic Resources - An international journal	16
Aplicação prática da abordagem ecossistémica às pescas	29
Apple-producing family farms in South Tyrol	12
Appropriate food packaging solutions for developing countries	47
Aquaculture development - 4. Ecosystem approach to aquaculture	30
Aquaculture development - 5. Use of wild fish as feed in aquaculture	30
Aquaculture development - 6. Use of wild fishery resources for capture-based aquaculture	30
Aquatic Biodiversity in Rice-based Ecosystems - Studies and reports from Indonesia, Lao PDR and the Philippines	12
Assessment and management of seafood safety and quality - Current practices and emerging issues	31
Atlas of trends in pastoral systems in the Sahel 1970-2012 - Information system on pastoralism in the Sahel	18
Bioslurry = Brown gold? - A review of scientific literature on the co-product of biogas production	20
Biotechnologies at Work for Smallholders - Case studies from developing countries in crops, livestock and fish	20
Building a common vision for sustainable food and agriculture - Principles and approaches	7

Index of titles

Bycatch in longline fisheries for tuna and tuna-like species - A global review of status and mitigation measures	7
Cambio climático, pesca y acuicultura en América Latina - Potenciales impactos y desafíos para la adaptación	31
Cassava Farmer Field Schools - Resource material for facilitators in sub-Saharan Africa	13
CEDAW - A tool for gender-sensitive agriculture and rural development policy and programme formulation	23
Climate change and agriculture in Jamaica - Agriculture sector support analysis	21
Climate change guidelines for forest managers	52
Codex Alimentarius Commission Procedural Manual - Twenty-first edition.....	47
Committee for inland fisheries and aquaculture for Africa - Report of the technical meeting and training on the aquaculture network for Africa (ANAF) website: data collection and dissemination tools - Jinja, Uganda, 22–25 November 2011	42
Committee on Fisheries - Report of the Fourteenth Session of the Sub-Committee on Fish Trade - Bergen, Norway, 24–28 February 2014.....	40
Communication for Rural Development Sourcebook.....	23
Compendium of food additive specifications - Joint FAO/WHO Expert Committee on Food Additives, 77th Meeting 2013	47
Construction and installation of hexagonal wooden cages for fish farming - A technical manual	32
Contract farming for inclusive market access	23
Decision Tools for Family Poultry Development	16
Deep-Sea Cartilaginous Fishes of the Indian Ocean - Volume 1. Sharks.....	32
Deep-sea Cartilaginous Fishes of the Indian Ocean - Volume 2. Batoids and Chimaeras	32
Developing new approaches to global stock status assessment and fishery production potential of the seas	33
Developing sustainable food value chains – Guiding principles.....	7
Empres360 Animal Health.....	16
Ending Hunger Challenge Badge	24
Evidence-based assessment of the sustainability and replicability of integrated food-energy systems - A guidance document	21
Expanding mariculture farther offshore - Technical, environmental, spatial and governance challenges.....	33

Expanding mariculture farther offshore - Technical, environmental, spatial and governance challenges - New edition, expanded	33
Facing the challenges of climate change and food security - The role of research, extension and communication for development	21
FAO Yearbook of Forest Products 1947-2012.....	52
FAO Yearbook of Forest Products 2008-2012	52
FAO's BEFS Bioenergy and Food Security Approach.....	20
Feeding and feed management of Indian major carps in Andhra Pradesh, India.....	34
Fish identification tools for biodiversity and fisheries assessments - Review and guidance for decision-makers	34
Fish marketing and consumption survey in the Kyrgyz Republic	34
Fisheries and aquaculture emergency response guidance	35
Fisheries and aquaculture emergency response guidance - Review recommendations for best practice FAO Workshop, 15–16 March 2012, Rome.....	35
Fisheries and aquaculture in Tajikistan: review and policy framework.....	35
Fisheries Management - 3. Managing fishing capacity	36
Food and agriculture policy decisions - Trends, emerging issues and policy alignments since the 2007/08 food security crisis	24
Food losses and waste in the context of sustainable food systems - A Report by the High Level Panel of Experts on Food Security and Nutrition - June 2014	48
Food Outlook - Biannual Report on Global Food Markets	24
Food Outlook - Biannual Report on Global Food Markets	25
Food wastage footprint - Impacts on natural resources	48
Forest Management and Conservation Agriculture - Experiences of smallholder farmers in the Eastern Region of Paraguay	13
Forests Challenge Badge	53
Formation participative et développement de curriculum pour les champs-écoles paysans en Guyane et au Suriname - Un guide pratique pour la lutte intégrée contre les ravageurs et l'aquaculture dans les systèmes rizicoles	13
Gender and climate change research in agriculture and food security for rural development - Training Guide – second edition	22
Genebank Standards for Plant Genetic Resources for Food and Agriculture.....	61
General Fisheries Commission For The Mediterranean - Report of the fifteenth session of the Scientific Advisory Committee - Rome 8–11 April 2013	40

Index of titles

General Fisheries Commission for the Mediterranean - Report of the Thirty-seventh Session - Split, Croatia, 13–17 May 2013.....	42
Genetic considerations in ecosystem restoration using native tree species	8
Gestión integrada de la producción et des déprédateurs du coton - Guide du facilitateur pour les Champs écoles des producteurs	14
Good Agricultural Practices for greenhouse vegetable crops - Principles for Mediterranean climate areas	61
Good emergency management practice: The essentials - A guide to preparing for animal health emergencies	8
Governing land for women and men - A technical guide to support the achievement of responsible gender-equitable governance of land tenure	58
Growing greener cities in Latin America and the Caribbean	25
Guidance on addressing child labour in fisheries and aquaculture	36
Guidance on weed issues and assessment of noxious weeds in a context of harmonized legislation for production of certified seed.....	62
Guidelines for assessing nutrition-related knowledge, attitudes and practices	48

Guidelines on the application of the environmental impact assessment procedure in aquaculture in the Central Asia and Caucasus region.....	37
Herramientas CAPFITOGEN - Fortalecimiento de las Capacidades en Programas Nacionales de Recursos F de América Latina – Versión 1.2	62
Identifying Benefit Flows - Studies on the Potential Monetary and Non-Monetary Benefits Arising from the International Treaty on Plant Genetic Resource for Food and Agriculture	62
Impact of international voluntary standards on smallholder market participation in developing countries - A review of the literature	14
Implementation Guidelines on Part B of the Code, the Voluntary Guidelines and the Safety Recommendations	37
Improving Diets and Nutrition - Food-based approaches	49
Improving governance of forest tenure - A practical guide	58
Inland fisheries evolution and management - Case studies from four continents	37
Innovative Accounting Framework for the Food-Energy-Water Nexus	59
Introduction to the Responsible Governance of Tenure	59
Land Tenure Journal - September 2013 Issue 1-13	59

Lineamientos de Política para el Desarrollo Sostenible del Sector Ganadero	8
Mainstreaming Disaster Risk Reduction into Agriculture - A case study from Bicol Region, Philippines	60
Managing climate risks and adapting to climate change in the agriculture sector in Nepal	22
Manual técnico para la construcción y el uso de los silos metálicos familiares para almacenar cereales y leguminosas de grano.....	9
Mechanization for Rural Development - A review of patterns and progress from around the world	63
Milk and dairy products in human nutrition	49
Mitigation of greenhouse gas emissions in livestock production - A review of technical options for non-CO ₂ emissions.....	17
Monitoring and analysing food and agricultural policies in Africa - Synthesis report 2013	25
Mountain Farming is Family Farming - contribution from mountain areas to the International Year of Family Farming 2014	14
Multicriteria-based ranking for risk management of food-borne parasites	49
Multiple-use forest management in the humid tropics - Opportunities and challenges for sustainable forest management	53
National Forest Funds (NFFs) - Towards a solid architecture and good financial governance	53
National Forest Monitoring Systems - Monitoring and measurement, reporting and verification (M&MRV) in the context of REDD + Activities.....	54
National planning for GHG mitigation in agriculture - A guidance document	22
Note d'orientation: Intégrer le droit à une alimentation adéquate aux programmes de sécurité alimentaire et nutritionnelle.....	26
OECD-FAO Agricultural Outlook 2013-2022	26
On-farm feeding and feed management in aquaculture.....	38
Panorama de la Seguridad Alimentaria y Nutricional en América Latina y el Caribe: 2014	9
Perspectivas de la agricultura y del desarrollo rural en las Américas: una mirada hacia América Latina y el Caribe: 2015	9
Pesticide residues in food - 2013 - Joint FAO/WHO Meeting on Pesticide Residues.....	50
Pesticides residues in food 2013 - Joint FAO/WHO Meeting on Pesticides Residues	63
Plan de Acción de la Estrategia Global para el Mejoramiento de las Estadísticas Agropecuarias y Rurales - Para la Seguridad Alimentaria, la Agricultura Sostenibles y el Desarrollo Rural	66
Policy Support Guidelines for the Promotion of Sustainable Production Intensification and Ecosystems Services.....	63

Index of titles

Poplars and Willows - Trees for Society and the Environment.....	54
Proceedings of the Second Ministerial Meeting on International Food Prices	26
Public Health Risks of Histamine and other Biogenetic Amines from Fish and Fishery Products - Joint FAO/WHO Expert Meeting.....	50
Pulp and Paper Capacities - Survey 2012-2017	66
Quality assurance for microbiology in feed analysis laboratories.....	17
Rapport de la vingt-septième session de la commission européenne consultative pour les pêches et l'aquaculture dans les eaux intérieures - Hämeenlinna (Finlande), 24–26 octobre 2012	38
Rapport des journées sous régionales de l'aquaculture dans les pays de l'Afrique du Nord - Monastir, Tunisie, 8-11 octobre 2012	38
Rebuilding West Africa's food potential: Policies and market incentives for smallholder-inclusive food value chains.....	27
Recetario Internacional de la Quinua: Tradición y vanguardia.....	50
Recomendaciones de seguridad para los buques pesqueros con cubierta de eslora inferior a 12 metros y los buques pesqueros sin cubierta	43
Rediscovering Wood: the key to a sustainable future - Proceedings of the Art and Joy of Wood - Conference 19–22 October 2011, Bangalore, India	54
Regional Commission For Fisheries - Report of the Seventh Meeting of the RECOFI Working Group on Fisheries Management - Kuwait City, the State of Kuwait, 5–7 November 2013	41
Report of the FAO Workshop on Bycatch Management and Low-impact Fishing - Kuwait City, the State of Kuwait, 9–12 December 2012	39
Report of the FAO/NEPAD workshop on climate change, disasters and crises in the fisheries and aquaculture sector in West and Central Africa - Accra, Ghana, 1–2 November 2012	39
Report of the FAO/SEAFDEC Workshop on Principles of Improved Fish Passage at Cross-River Obstacles, with Relevance to Southeast Asia - Khon Kaen, Thailand, 17–20 March 2013	39
Report of the scoping workshop on regional cooperation programme for responsible aquaculture and fisheries development in the Central Asian and Caucasian countries - Urumqi, Xinjiang Urumqi Autonomous Region, China, 4–8 June 2012.....	40
Report of the Seventh Session of the Regional Commission for Fisheries - Tehran, Islamic Republic of Iran, 14–16 May 2013	41
Report of the Seventh Session of the Sub-Committee on Aquaculture - St. Petersburg, Russian Federation, 7–11 October 2013	41
Report of the technical consultation on flag state performance - Rome, 2–6 May 2011, 5–9 March 2012 and 4–8 February 2013	42

Residue Evaluation of Certain Veterinary Drugs - Joint FAO/WHO Expert Committee on Food Additives	17
Respecting free, prior and informed consent - Practical guidance for governments, companies, NGOs, indigenous people and local communities in relation to land acquisition	60
Rights-based management in Latin American fisheries	43
Save and Grow: Cassava - A guide to sustainable production intensification	15
Save and Grow: Maize, Rice and Wheat - A policymaker's guide to the sustainable intensification of smallholder production.....	10
Small-scale aquaponic food production	10
Social analysis for agriculture and rural investment projects	15
State of Mediterranean Forests 2013.....	55
State of the art on the initiatives and activities relevant to risk assessment and risk management of nanotechnologies in the food and agriculture sectors - FAO/WHO technical paper.....	51
State of the World's Forests 2014	55
State of the World's Forests 2014 - Enhancing the socioeconomic benefits from forests.....	4
Strengthening Forest Tenure Systems and Governance - Training module for facilitators	55
Strengthening organizations and collective action in fisheries - A way forward in implementing the international guidelines for securing sustainable small-scale fisheries	43
The feed analysis laboratory: establishment and quality control - Setting up a feed analysis laboratory, and implementing a quality assurance system compliant with ISO/IEC 17025:2005.....	18
The funding strategy of the International Treaty	64
The Ocean Challenge Badge	44
The State of Food and Agriculture 2013 - Food Systems for Better Nutrition	27
The State of Food and Agriculture 2014 - Innovation in family farming	5
The State of Food Insecurity in the World 2013 - The multiple dimensions of food security	27
