

HIGHLIGHTS

**The state of the world's aquatic genetic resources for food and agriculture**

This report is an assessment of the current understanding and use of aquatic genetic resources (AqGR) for the benefit and sustainability of aquaculture. It investigates the trends and looks at the roles of current AqGR stakeholders, research, education and legislation. The report will be presented during the tenth session of the [COFI Sub-Committee on Aquaculture](#) (23–27 August 2019) in Norway.

An in brief version is also available in [English](#).

[Press release](#)

**FAO Yearbook – Forest products, 2017**

This is a compilation of statistical data on production and trade in forest products for all countries and territories of the world from 2013 to 2017. It contains annual data on the volume and value of trade in forest products, examples being roundwood, pulp and recovered paper and sawn wood and veneer sheets.

(436 pp., multilingual in Arabic, Chinese, English, French, Russian and Spanish)

**FAO Yearbook – Fishery and aquaculture statistics, 2017**

This edition contains global statistics on capture fisheries, aquaculture, commodity production and trade, apparent fish consumption and employment within the industry as well as issues and trends related to the reported data.

(108 pp., trilingual in English, French and Spanish)

NEW BROCHURES

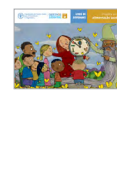

**Cómo establecer alianzas efectivas con el sector privado para el desarrollo de agonegocios**

(2 pp., also available in [English](#))

**Conflits, systèmes alimentaires et nutrition**

(8 pp., also available in [English](#))

**Eating healthy matters**

(24 pp., Portuguese. Also available in [Arabic](#), [Chinese](#), [English](#), [French](#), [Italian](#), [Russian](#) and [Spanish](#)) [FAO activity book](#)

**European Forestry Commission Working Party on the Management of Mountain Watersheds**

(2 pp.)

**European Forestry Commission Working Party on the Management of Mountain Watersheds**

Working group:  
Forest and water

(2 pp.)

**European Forestry Commission Working Party on the management of mountain watersheds**

Working group:  
Hazards and disaster risk management in mountains

(4 pp.)

**International Year of Plant Health 2020**

(7 pp., Chinese. Also available in [English](#), [Russian](#) and [Spanish](#))

**Implementing the Food Insecurity Experience Scale (FIES) in surveys**

(4 pp.)

**Resilient watershed management programme**

(2 pp.)

## COLLECTIVE ACTION FOR THE SDGs: Alliances, Data and Policy

**Alliances for transformative action: Fostering producer-centric, multi-level coordination and investment**

(2 pp.)

**One planet: Delivering on SDG 12 through the One Planet Sustainable Food Systems Programme**

(2 pp.)

**Measuring the SDGs: Improving country data for monitoring SDG achievements and informing policy decisions**

(2 pp.)

**Food and Agriculture – Forum for the SDGs: Giving stakeholders a voice in SDG implementation through online dialogue and debate**

(2 pp.)

**Integrated policy support: Assisting countries to transform food and agriculture to achieve the SDGs**

(2 pp.)

## NEW BOOKS AND BRIEFS

### ANIMAL PRODUCTION AND HEALTH

**Developing sustainable value chains for small-scale livestock producers**

This publication addresses the implementation of a sustainable, livestock-specific food value chain by addressing the challenges small-scale livestock producers face, such as restricted access to the market, and thus, their restricted ability to compete with their larger counterparts.

(158 pp.) FAO animal production and health guidelines series

**Poultry Sector Ethiopia**

This review, in part, explains how small-extensive scavenging family poultry systems work in Ethiopia by focusing on the critical importance of feed resources, such as household waste, leftovers, field crops, worms and insects, for the sustainability of individual farms and the industry.

(160 pp.) FAO animal production and health livestock country review

**Water use in livestock production systems and supply chains: Guidelines for assessment**

These guidelines identify ways to optimize water use in livestock production – addressing available monitoring tools, such as a water use, productivity and scarcity impact assessments, and international standards, such as ISO 14046 – to reduce the demand of freshwater resources as the global population grows.

(130 pp.) LEAP guidelines

### ECONOMIC AND SOCIAL DEVELOPMENT

**Land and water governance to achieve the SDGs in fragile systems**

This paper demonstrates how land and water governance, through the adoption of an open dialogue with the public and the use of non-discriminatory regulations, can help improve the resilience of fragile environments where water scarcity and land degradation threaten sustainable development.

(66 p.)

**Preparing and accessing decent work amongst rural youth in Cambodia**

This case study reports on gaps, including language, IT and technical skills in Cambodia's agricultural workers. In response to these deficits and other challenges, policymakers have adopted technical and soft skill development programmes to invest in the future of their agricultural workforce.

(98 pp.) Rural employment information material – FAO & Humboldt University of Berlin

**Pulp and paper capacities survey 2018–2023**

Based on figures received from 39 country correspondents, this annual survey provides extensive tables of production capacity data by country for pulp and paper and the volume of production capacity for each product and product aggregate code. It also provides a detailed list of definitions.

(216 pp., trilingual in English, French and Spanish)
